The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government **Urban and Environmental Economics** Graham

Hartwick, 2015-04-17 This textbook offers a rigorous calculus based presentation of the complexities of urban economics which is suitable for students who are new to the subject It focuses on structural details and explains the elements that make cities such highly productive entities and also explores explores the mechanisms of labour productivity enhancement that are unique to cities Written with a focus on location theory key topics include How cities are arranged Housing prices Urban transportation Why some cities grow rapidly whilst others decline How wages adjust to local costs of living How suburbs function in relationship to the urban core Public finance This book will be essential reading for Urban Economics courses at both undergraduate and postgraduate Urbanization and Socio-Economic Development in Africa Steve Kayizzi-Mugerwa, Abebe Shimeles, Nadège level Désirée Yaméogo, 2014-05-16 The main goal of this book is to put urbanization and its challenges squarely on Africa s development agenda Planned urbanization can improve living conditions for the majority help in the expansion of the middle class and create conditions for economic transformation However many African cities have developed haphazardly resulting in the decline of public services in slum proliferation and increases in poverty African cities thrive on activities characterized by easy entry and low productivity generally referred to as the informal sector Indeed today some urban dwellers are poorer than their cousins in the countryside In spite of reform attempts many governments have not been able to create an enabling environment with adequate infrastructure and institutions to sustain markets for easy exchange and production This study argues that with careful policies and planning the situation can be changed If the recent natural resource led economic boom that we have seen in many African countries is used for structural reforms and urban renewal African cities could become

centers of economic opportunity The challenge for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth The Oxford Handbook of Economic Geography Gordon L.
