**Law Enforcement and the Fight Against Methamphetamine** United States. Congress. House. Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources, 2005

The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug

trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America's strategic interest. As a result, US policy approaches emerge as a decisive factor in accounting for the failure of prohibition.

Amphetamines and Ecstasy, 2008      **The Pope's Children** David McWilliams, 2011-01-11 Named for the ironic coincidence of the Irish baby boom of the 1970s which peaked nine months to the day after Pope John Paul II's historic visit to Dublin, *The Pope's Children* is both a celebration and a biting, funny portrait of the first generation of the Celtic Tiger, the beneficiaries of the economic miracle that propelled Ireland from centuries of deprivation into a nation that now enjoys one of the highest living standards in the world.      **International Drug Control Into the 21st Century** Hamid Ghodse, 2008 Providing a comprehensive analysis of drug misuse, dependence, and the ways in which different parts of the world have responded to these problems, this volume examines aspects of the contemporary drug problem, the related debate, and the way in which society is responding to it.      David McWilliams' The Pope's Children David McWilliams, 2005-11-15 Meet *The Pope's Children*, the beneficiaries of the 'Wonderbra Economics' of the Irish baby boom of the 1970s that peaked nine months to the day after the Pope's visit. There are 620,000 of them squeezed into the middle and lifted up by the 'Expectocracy'. Ireland is blurring. Out of this haze has come the 'Full on Nation', the most hedonistic generation ever. David McWilliams' brilliant research and analysis of Ireland is a celebration of success. In an easy-to-read style, he takes us to 'Deckland', that suburban state of mind where you will find the Kells Angels, Breakfast Roll Man, Low GI Jane, and RoboPaddy. Come face-to-face with the 'You're a Star' generation, Billy Bunker, fair trade Frank, Carrot Juice Contrarians, and Bouncy Castle Brendan. We also meet the HiCos, Hibernian Cosmopolitans, the new elite whose distance from Deckland is measured by appreciations and cultivations that Deckland's rampant credit just can't buy. Entertaining and informative, *The Pope's Children* tells of the vast surge of ambition, money, optimism, and hope in Ireland during the boom.      **Drugs and Contemporary Warfare** Paul Rexton Kan, 2009 The relationship between drugs and today's wars has grown more noticeable since the end of the Cold War and will likely gather strength in this era of increased globalization. Many violent groups and governments have recently turned to illicit narcotics in their entrepreneurial quests to stay viable in the post-Cold War world. It is no coincidence that many of the most violent and ongoing conflicts, from the Balkans to the Hindu Kush, from the Andes to the Golden Triangle, occur in areas of widespread drug production and well-traveled distribution routes. Interdisciplinary in its approach, *Drugs and Contemporary Warfare* investigates the convergence of drugs and modern warfare, the violent actors involved in the drug trade, the drugs they produce and distribute, and how these drugs enter into battlefield conflicts and give rise to combat narcosis. Paul Rexton Kan then examines counternarcotics operations and suggests solutions to curb the drug trade's effects on contemporary conflict. He offers several broad strategies that refine assessments, policies, and operations to promote improvement in social, economic, and political conditions. The hope is that these strategies will help citizens create sustainable societies and robust governments in war-afflicted countries struggling under the drug trade's shadow. In a world

searching for peace the answer may not solely be on the battlefield but also on the front line against illegal narcotics With a foreword by Moisés Nam editor in chief of Foreign Policy magazine and the author of *Illicit How Smugglers Traffickers and Copycats Are Hijacking the Global Economy* **Drugs, Clubs and Young People** Bill Sanders, 2016-04-29 In this volume contributors employ sociological and public health perspectives to offer insights into behaviours common at raves and nightclubs The volume provides theoretical observations on illicit club drug use and supply helping to challenge current orthodoxies on the role of drug use within young peoples lives Drawing material from the USA UK and Hong Kong the volume allows the demystification of stereotypical presentations surrounding young people who attend clubs and or use club drugs This work provides a badly needed and objective analysis of youthful drug use and a foundation from which future sociological and public studies on young people clubs and drugs as well as young people themselves will benefit *Forensic Chemistry of Substance Misuse* Leslie A King, 2019-03-22 This book builds on an earlier publication by the same author *The Misuse of Drugs Act A Guide for Forensic Scientists* It provides a chemical background to the domestic and international legal controls on drugs of abuse and related substances and includes coverage of designer drugs and generic analogue controls from the UK US and New Zealand perspectives The content of the book has been fully updated and rearranged and the scope has been considerably expanded More general chapters cover the recent history of the drug classification debate and a proposal for consolidating a wide range of legal controls on chemical substances An account is provided of the Early Warning System on New Psychoactive Substances in operation in the European Union Technical and subsidiary material is placed in 20 Appendices which list controlled substances and cover topics such as precursor chemicals related legislation sentencing guidelines and detailed chemical pharmacological profiles of the most commonly abused drugs There is a glossary and a bibliography while extensive footnotes support the text and provide references to selected publications and Internet sources The book contains a number of unique features not found in any other single publication For the forensic scientist the book contains a complete list of all drug substances controlled by UK and International law It explains the chemical structural definitions and the significance to the legislation of terms such as salt base stereoisomer ester ether derivative homologue and isotope For the more general reader there is an account of the history of domestic European and International drugs control the long debate about drug classification the role of risk assessment and how the legal control of a wide range of harmful chemical substances might be consolidated For the criminal lawyer the book provides a useful adjunct to standard works on case and statute law This unique book has general appeal to anybody needing information on drugs of abuse including forensic scientists researchers teachers criminal lawyers customs officers postgraduate and graduate students It is of particular interest to those studying forensic science [Introduction to Neuropsychopharmacology](#) Leslie Iversen, 2009 The text ranges from drugs that affect the mood and behavior to hypnotics narcotics anticonvulsants and analgesics as well as a variety of drugs that affect the autonomic nervous system and

psychoactive drugs used for non medical reasons nicotine alcohol opiates psychostimulants and cannabis BOOK JACKET

**Drug Abuse: Prevention and Treatment** Mangai Natarajan, 2017-05-15 Ever since the Shanghai convention in 1909 the threat posed to human well being by drug abuse has led countries around the world to take action to deal with their drug problems There are wide variations in the policies pursued but most countries try to reduce both the supply of and the demand for drugs Unfortunately there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them Consequently control and prevention policies are mostly driven by political considerations economic realities and cultural expectations though research has played an important part in formulating and evaluating treatments for drug addiction This volume reviews studies on drug abuse prevention and treatment strategies under five main areas 1 Reducing supply strategies to control the flow of drugs from production to retail distribution 2 Reducing demand prevention of drug use at all stages of involvement and consumption levels 3 Reducing harm promoting situational risk reduction practices for regular users addicts and recreational users 4 Reducing addiction drug treatment options for various groups in various settings and 5 Drug policies and prescriptions focused on debates about prohibition and legalization Report of the International Narcotics Control Board (2007), 2009 Illicit drug supply and demand are inextricably linked components of a single phenomenon Contents of this 2007 report by the International Narcotics Control Board I The Principle of Proportionality and Drug Related Offenses II Operation of the International Drug Control System III Analysis of the World Situation IV Recommendations to Governments the United Nations and Other Relevant and Regional Organizations Annexes I Regional Groupings Used in the Report of the International Narcotics Control Board II Current Membership of the International Narcotics Control Board **World Drug Report 2010**, 2010 Opens with a discussion of the markets for heroin cocaine and amphetamine type stimulants Follows with statistics and statistical trends for all major drug categories Includes the latest information on drug production seizures and consumption as well as a discussion on the relationship between drug trafficking and instability Effective Crime Reduction Strategies James F. Albrecht, Dilip K. Das, 2011-02-22 The International Police Executive Symposium IPES [www.ipes.info](http://www.ipes.info) coordinates annual international conferences to evaluate critical issues in policing and recommend practical solutions to law enforcement executives deployed across the globe Drawn from the 2005 proceedings hosted by the Czech Republic in Prague Effective Crime Reduction Strategie **Health in the European Union** Philipa Mladovsky, 2009 Good health is a fundamental resource for social and economic prosperity and Europe has seen improvements over the past few decades in both health status and living and working conditions But this study investigates differences in health status within and between European countries and examines some of the challenges faced by those seeking a healthier and more equitable society Within the context of the European Union the range of living conditions has widened tremendously in recent years as the Union has gone through an enlargement process This diversity has translated into varied patterns of health across the region Inequalities in income

education housing and employment have directly or indirectly affected public health In addition certain diseases and causes of death are more likely to affect young people whereas most are associated with older ages All these factors need to be taken into account and this study addresses some of the complexities involved This book discusses and analyzes the relationship between living conditions socioeconomic factors and health with the objective of framing a debate and policy action to create a healthier and fairer society across Europe This study will stimulate focused discussion by offering an essential overview of key issues affecting European nations and the health and well being of their peoples
