Grinning with the Gipper James S. Denton, P. J. O'Rourke, Peter Schweizer, 1988-09-01 Reagan, American Icon
Robert Paul Metzger, 1989 The Senses of Humor Daniel Wickberg, 2015-01-26 Why do modern Americans believe in something called a sense of humor and how did they come to that belief Daniel Wickberg traces the relatively short cultural history of the concept to its British origins as a way to explore new conceptions of the self and social order in modern America More than simply the history of an idea Wickberg's study provides new insights into a peculiarly modern cultural sensibility The expression sense of humor was first coined in the 1840s and the idea that such a sense was a personality trait to be valued developed only in the 1870s What is the relationship between medieval humoral medicine and this distinctively modern idea of the sense of humor What has it meant in the past 125 years to declare that someone lacks a sense of humor Why do modern Americans say it is a good thing not to take oneself seriously How is the joke as a twentieth century quasi literary form different from the traditional folktale Wickberg addresses these questions among others and in the process uses the history of ideas to throw new light on the way contemporary Americans think and speak about humor and laughter The context of Wickberg's analysis is Anglo American the specifically British meanings of humor and laughter from the sixteenth century forward provide the framework for understanding American cultural values in the nineteenth and twentieth centuries The genealogy of the sense of humor is like the study of keywords an avenue into a significant aspect of the cultural history of modernity Drawing on a wide range of sources and disciplinary perspectives Wickberg's analysis challenges many of the prevailing views of modern American culture and suggests a new model for cultural historians Cheering for Self James S. Vass Jr, James Vass Jr, 2003-05-13 This book is a study of UW men's basketball fans during the 2001 2002 season and explores their proclivity to cheering for self during basketball events The term basketball event is used rather than basketball game to make clear that everything connected to and seen heard or experienced before during and after a basketball game is included The actual game itself is only part of the basketball event An undercurrent runs throughout this participant observation mini ethnography dealing with access and the relative quality of that access to basketball events being affected by one's age class race and gender The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products both commercial and institutional during the process of cheering for self is central to this idea Cheering for self is the activity engaged in by individual fans after they find things to identify or connect with through personal investment Fans cheer for self indirectly Fans cheer for the team that they identify with Through the process of cheering for self while attending the basketball event people are taught how to become fans to consume a UW product the basketball event and to consume advertisers products People have a tendency to spend their entire life trying to impress
