Decision Making with the Analytic Network Process Thomas L. Saaty, Luis G. Vargas, 2013-05-14 The Analytic Network Process ANP developed by Thomas Saaty in his work on multicriteria decision

making applies network structures with dependence and feedback to complex decision making This new edition of Decision Making with the Analytic Network Process is a selection of the latest applications of ANP to economic social and political decisions and also to technological design The ANP is a methodological tool that is helpful to organize knowledge and thinking elicit judgments registered in both in memory and in feelings quantify the judgments and derive priorities from them and finally synthesize these diverse priorities into a single mathematically and logically justifiable overall outcome In the process of deriving this outcome the ANP also allows for the representation and synthesis of diverse opinions in the midst of discussion and debate The book focuses on the application of the ANP in three different areas economics the social sciences and the linking of measurement with human values Economists can use the ANP for an alternate approach for dealing with economic problems than the usual mathematical models on which economics bases its quantitative thinking For psychologists sociologists and political scientists the ANP offers the methodology they have sought for some time to quantify and derive measurements for intangibles Finally the book applies the ANP to provide people in the physical and engineering sciences with a quantitative method to link hard measurement to human values In such a process one is able to interpret the true meaning of measurements made on a uniform scale using a unit

Group Decision Making Thomas L. Saaty, Kirti

Peniwati, 2013-11-15 When a group makes a decision that decision carries a lot more weight than when just one person does it Think of the founding fathers of the American constitution and how much power and influence their ideas have had in the entire world for more than two hundred years Also think of gravity a universal force brought about by an enormous number of minute particles that band together to make a universal law Together they create a massive force a law of nature alone they can barely be noticed That is how our minds work by deciding together to create a power that transcends our individuality Group decision making is a gift and an opportunity to create greater influence through the working together of many minds This book shows how to use the Analytic Hierarchy Process for hierarchical decision making and the Analytic Network Process for decision making in networks with dependence and feedback in group decision making Part I discusses the group and the decision and shows the importance of using a structured process particularly for those high value decisions involving many powerful parties with different interests It discusses how to facilitate a group decision combine individual judgments and smooth differences to arrive at a decision that everyone can live with and get behind Part II discusses the group in planning and how to draw out differences Part III is about conflict resolution and Part IV is about how to address significant issues that come up in group decision making and shows that it is possible to construct an overall group preference
