   **Groupware** David Marca,Geoffrey Bock,1992     *Computer-Supported Cooperative Work* Uwe M. Borghoff,Johann H. Schlichter,2013-11-09 The terms groupware and CSCW computer supported cooperative work have received significant attention in computer science and related disciplines for quite some time now This book is a revised and extended version of the 2nd edition of the German textbook Rechnergest tzte Gruppenarbeit Eine Einf hrung in verteilte Anwendungen It has two main objectives first to outline the meaning of both terms and second to point out both the numer ous opportunities for users of groupware and the risks of applying such sys tems The book intends to introduce an area of distributed systems namely the computer support of individuals trying to solve a common problem in cooperation with each other but not necessarily having identical work pi aces or working times Computer supported cooperative work is an interdisciplinary application domain It can be viewed as a synergism between the areas of distributed sys tems and multimedia communication on the one hand and between those of information science and socio organizational theory on the other hand Thus the book is meant to help students of aH these disciplines as weH as users and developers of systems which have communication and cooperation within groups as top priorities     **Readings in Groupware and Computer-supported Cooperative Work** Ronald M. Baecker,1993 This comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work CSCW The papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading sourcebook to the field development or purchase of groupware technology as well as for researchers and managers groupware and human computer interaction     The Design of Computer Supported Cooperative Work and Groupware Systems Dan Shapiro,Michael Tauber,Roland Traunmüller,1996-03-29 The phrases the information superhighway and the the information societyare on almost everyone s lips CSCW and groupware systems are the key to bringing those phrases to life To an extent that would scarcely have been imaginable a few years ago the contributions in this volume speak to each other and to a broader interdisciplinary context The areas of ethnography and design the requirements and principles of CSCW design CSCW languages and environments and the evaluation of CSCW systems are brought together to bring to light how activities in working domains are really in practice carried out The aim above all is to do justice to the creativity and versatility of those whose work they aim to support     **Collaborative Dialogue Technologies in Distance Learning** M.Felisa Verdejo,Stefano A. Cerri,2012-12-06 In April 1993 an interdisciplinary NATO Advanced Research Workshop on Collaborative dialogue technologies in distance learning was held in Segovia Spain The workshop brought together researchers in fields related to distance learning using computer mediated communication The statement of justification of the NATO ARW follows hereafter Justification of the NATO Advanced Research Workshop on Collaborative Dialogue Technologies in Distance Learning Computer Mediated Communication CMC

systems have features that reduce some temporal physical and social constraints on communication Theories of communication have shifted from viewing communication as a linear transmission of messages by a sender to a receiver to viewing it as a social paradigm where individuals are actors in a network of interdependent relationships embedded in organizational and social structures Recent research focuses on models of information sharing to support not only the activities of individuals but also the problem solving activities of groups such as decision making planning or co writing This area of research is called Computer Supported Cooperative Work CSCW The Artificial Intelligence AI approach uses knowledge based systems to enhance and facilitate all these processes including the possibility of using natural language The traditional model of distance education places a strong emphasis on indepen dent study supported by well developed learning materials This model can be characterized as one way media However the potential of CMC to provide better guidance to the student in Higher Distance Education has been quickly recognized for at least two kind of activities information sharing and interaction **Encyclopedia of Computer Science and Technology** Allen Kent,James G. Williams,1996-07-26 Acquiring Task Based Knowledge and Specifications to Seek Time Evaluation *Proceedings of the Third European Conference on Computer-Supported Cooperative Work 13–17 September 1993, Milan, Italy ECSCW '93* Giorgio De Michelis,Carla Simone,K. Schmidt,2012-12-06 Computer Supported Cooperative Work CSCW is an interdisicplinary research area devoted to exploring the issues of designing computer based systems that enhance the abilities of cooperating workers to coordinate and integrate their activities in an efficient effective and flexible manner This rigorously selected volume represents both practical and theoretical approaches from many of the leading researchers in the field As an interdisciplinary area of research CSCW is characterized by bringing together widely disparate research traditions and perspectives into an arena of collaboration and contention The selected papers reflect the diverse approaches and cultures of this multi disciplinary field This collection will be of interest to a wide audience because of the huge practical import of the issues and because of the interdisciplinary nature of the problems and the solutions proposed In particular the volume will be of interest to researchers and professionals in computing sociology cognitive science and human factors **Computer-supported Cooperative Work** Stephen A R. Scrivener,2018-08-13 Published in 1994 this work supplies an up to date view of Computer Supported Cooperative Work CSCW and its role in empowering groups to achieve better solutions faster The enabling technology and group organizational and behavioural aspects of CSCW should be of interest to a wide audience **Groupware: Design, Implementation, and Use** Luis Carriço,Nelson Baloian,Benjamim Fonseca,2009-09-04 This book constitutes the refereed post conference proceedings of the 15th International Workshop on Groupware Design Implementation and Use held in Peso da R gua Douro Portugal during September 13 17 2009 The 30 papers presented were carefully reviewed and selected from numerous submission The topics covered are mobile collaboration social aspects of collaboration technology for CSCW groupware evaluation CSCW design geo collaboration collaborative learning and modeling CSCW **Advances in**

**Computers** ,1997-08-19 Since its first volume in 1960 Advances in Computers has presented detailed coverage of innovations in hardware and software and in computer theory design and applications It has also provided contributorswith a medium in which they can examine their subjects in greater depth and breadth than that allowed by standard journal articles As a result many articles have become standard references that continue to be of significant lasting value despite the rapid growth taking place in the field     **Groupware: Design, Implementation, and Use** Gert-Jan de Vreede,Luis A. Guerrero,Gabriela Marín Raventós,2004-11-02     **Readings in Human-Computer Interaction** Ronald M. Baecker,2014-06-28 The effectiveness of the user computer interface has become increasingly important as computer systems have become useful tools for persons not trained in computer science In fact the interface is often the most important factor in the success or failure of any computer system Dealing with the numerous subtly interrelated issues and technical behavioral and aesthetic considerations consumes a large and increasing share of development time and a corresponding percentage of the total code for any given application A revision of one of the most successful books on human computer interaction this compilation gives students researchers and practitioners an overview of the significant concepts and results in the field and a comprehensive guide to the research literature Like the first edition this book combines reprints of key research papers and case studies with synthesizing survey material and analysis by the editors It is significantly reorganized updated and enhanced over 90% of the papers are new An invaluable resource for systems designers cognitive scientists computer scientists managers and anyone concerned with the effectiveness of user computer interfaces it is also designed for use as a primary or supplementary text for graduate and advanced undergraduate courses in human computer interaction and interface design Human computer interaction historical intellectual and social Developing interactive systems including design evaluation methods and development tools The interaction experience through a variety of sensory modalities including vision touch gesture audition speech and language Theories of information processing and issues of human computer fit and adaptation     Human-Computer Interaction in Various Application Domains Constantine Stephanidis,Gavriel Salvendy,2024-08-23 Human Computer Interaction HCI is a multidisciplinary research and applied field targeted to studying people interacting with information technology and designing usable and efficient systems for them This book outlines the state of the art of HCI research in the respective domain such as health games transportation industry and entertainment This book Bridges the gap between theory and practice by presenting how to apply HCI methods and tools in specific domains Offers concrete examples of HCI use in real world situations Presents case specific best practices tips and tricks Includes chapters that are well studied and purposefully selected representing important theoretical practical and research areas in HCI Includes domains ranging from the roots and the classic approaches of human computer interaction to contemporary advancements This book is a fascinating read for individuals interested in Human Computer Interaction research and applications     **Coordination Theory and Collaboration Technology** Gary M. Olson,Thomas W.

Malone,John B. Smith,2013-05-13 The National Science Foundation funded the first Coordination Theory and Collaboration Technology initiative to look at systems that support collaborations in business and elsewhere This book explores the global revolution in human interconnectedness It will discuss the various collaborative workgroups and their use in technology The initiative focuses on processes of coordination and cooperation among autonomous units in human systems in computer and communication systems and in hybrid organizations of both systems This initiative is motivated by three scientific issues which have been the focus of separate research efforts but which may benefit from collaborative research The first is the effort to discover the principles underlying how people collaborate and coordinate work efficiently and productively in environments characterized by a high degree of decentralized computation and decision making The second is to gain a better fundamental understanding of the structure and outputs of organizations industries and markets which incorporate sophisticated decentralized information and communications technology as an important component of their operations The third is to understand problems of coordination in decentralized or open computer systems *Systems Science and Collaborative Information Systems: Theories, Practices and New Research* Currás, Emilia,2011-11-30 Recent changes in information science have emerged as a result of challenges faced by the business social and scientific worlds as well as continued progress in information and communication technologies Organizations have begun to seek collaborative and joint efforts that allow them to better participate in challenging and competitive opportunities This is illustrated by the creation of highly integrated supply chains virtual libraries and organizations and virtual laboratories Systems Science and Collaborative Information Systems Theories Practices and New Research examines the impact of new information services on day to day activities from a range of contemporary technical and socio cultural perspectives This collection also creates a sound theoretical basis for information systems and new research opportunities in the field **Computer Supported Co-operative Work** Michel Beaudouin-Lafon,1999-01-21 This volume examines various aspects of software systems tools and techniques for CMC computer mediated communication Themes include groupware tools and toolkits shared editing mediaspaces co ordination tools integrated tools applications and software infrastructure **Computer Supported Cooperative Work in Design III** Weiming Shen,Junzhou Luo,Zongkai Lin,Jean-Paul A. Barthès,Qi Hao,2007-08-04 This book constitutes the thoroughly refereed post proceedings of the 10th International Conference on Computer Supported Cooperative Work in Design CSCWD 2006 held in Nanjing China in May 2006 Among topics covered are CSCW techniques and methods collaborative design collaborative manufacturing and enterprise collaboration Web services knowledge management security and privacy in CSCW systems workflow management and e learning *Workflow Management Systems for Process Organisations* Thomas Schael,2013-11-11 As the business environment has become more and more turbulent over the past decade information technology has begun to run into the danger of becoming an impediment rather than a motor of progress In order to deal with the need for rapid continuous change computer science is challenged to

develop novel interrelated information and communication technologies and to align them with the social needs of co operating user groups as well as the management requirements of formal organisations Workflow systems are among the most advertised technologies addressing this trend but they mean different things to different people Computer scientists understand workflows as a way to extract control from application programs thus making them more flexible Bureaucratic organisations and most commercial products perceive them as supporting a linear or branching flow of documents from one workplace to another the next try after the failure cf office automation This book takes another perspective that of the modem customer driven and groupwork oriented process organisation Extending the language action perspective from the CSCW field its customer oriented view of workflows enables novel kinds of business process analysis and leads to interesting new combinations of information and co operation technologies Schal s empirical studies show some of the pitfalls resulting from a naive use of these technologies and exemplify ways to get around these pitfalls     *Collaboration and Technology* Gwendolyn Kolfschoten,Thomas Herrmann,Stephan Lukosch,2010-09-15 This book constitutes the proceedings of the 16th Collaboration Researchers International Working Group Conference on Collaboration and Technology held in Maastricht The Netherlands in September 2010 The 27 revised papers presented were carefully reviewed and selected from numerous submissions They are grouped into seven themes that represent current areas of interest in groupware research knowledge elicitation construction and structuring collaboration and decision making collaborative development awareness support for groupware design social networking and mobile collaboration     *Computer-supported Cooperative Work and Groupware* Saul Greenberg,1991 Based upon the International Journal of Man Machine Studies special editions published in February and March of 1991 Saul Greenberg s book will provide the novice with insight into the field of computer supported cooperative work and groupware It will also inform the active computer supported cooperative work researcher of several new projects and perspectives With an exhaustive bibliography this will be an essential book for researchers in human computer interaction and artificial intelligence expert systems builders and user interface designers
