Type 1 Diabetes

# Diabetes and Me

## Do you wonder...

Why do I have to stop playing for a snack?

Why do I have to get my finger poked?

Why do I need shots?

This is because you have diabetes.  
Say "dye-uh-BEE-tees."

What is that?  
Let's find out!

## What's going to change?

You can still go to school! You can still play with friends! You can still have fun!

You are still the same great kid you were before you found out that you have diabetes. Sometimes you will have to do special things, like eat a snack on the bus. Or you may have to go to the school nurse for help. You will also have to take medicine and have your blood tested.

But remember, you are not alone! Your family, your friends, and your doctors and nurses will take extra special care of you.

## Why did I get type 1 diabetes?

You didn't do anything to get type 1 diabetes, and you didn't catch it from anyone around you! Your body just is not working exactly as it should. You are not alone. There are kids all over the world that have type 1 diabetes, just like you. There are even grownups too!

## What are the signs of diabetes?

When you first have diabetes, you may feel like you want to:

Go to the bathroom a lot.

Drink a lot.

Eat a lot.

Sleep a lot.

These are all signs that you may have diabetes. Your doctor may have tested your blood to see if you have diabetes.

**Eat, Chew, Live** John Poothullil, 2015-03-16 Diabetes is among the fastest growing diseases in the world In the U S 1 in 3 adults over age 20 has high blood sugar and 1 in 4 adults over age 65 is fully diabetic Yet nearly every single person could avoid high blood and diabetes if they understood its real causes and Eat Chew Live provides exactly the new science in fact he demonstrates that insulin resistance is not even logical Instead high blood sugar and diabetes are the result of over consumption especially of grain based carbohydrates that cause a normal bodily metabolism cells burning fatty acids rather than glucose to go haywire When people understand this insight everything about preventing high blood sugar and diabetes becomes clear Eat Chew Live goes on to present three other revolutionary ideas to help people get in tune with their body's need for nutrition their hunger and satisfaction signals and the causes of their overeating Dr Poothullil's offers insightful and persuasive advice about why avoiding complex carbohydrates even whole grain and gluten free is the key to losing weight and preventing high blood sugar He goes on to teach readers how to eat mindfully chewing fully to enjoy and savor food Many readers report that the book helped them lose weight get in touch with their body and reduce their diabetes medications significantly Eat Chew Live is unlike other books on diabetes as nearly every one accepts insulin resistance as the cause Dr Poothullil's theory is a medically sound new approach to explaining high blood sugar and the implications are enormous for the entire medical approach to treating high blood sugar with medications rather than teaching people how to eat what they enjoy to lower blood sugar Eat Chew Live may be one of the most important health books of the decade as its 4 revolutionary ideas will save many lives
