Josef Redlich

Growth And Reform Of English Local Government:

Local Government in England: The growth of English radicalism and its influence on the government of the country Josef Redlich,1903 **Who Ran the Cities?** Ralf Roth,2017-03-02 The question of who actually ran cities in the eighteenth nineteenth and twentieth centuries has been increasingly debated in recent years As well as trying to understand the distribution of political power and the rise of broad political participation urban historians have questioned how and whether elites retained influence in municipal government The essays in this collection provide a detailed examination of the relationship between urban elites and the exercise of power bringing together economic social and cultural history with the political history of power resources and decision making The volume challenges common perceptions of a monolithic urban elite by looking at specific case studies Collectively these essays provide a more sophisticated view of the exercise of urban power as the negotiation of various elite groups defined by their economic social political or cultural privilege To contribute to this complex account of the history of cities elites and their influence the collection applies a range of methodological approaches to studying European and American cities as well as the wider world *The Growth and Reform of English Local Government* William Thornhill,1971 **The Origin and Growth of the English Constitution** Hannis Taylor,1898

commissioned chapters by British and German political scientists as well as experts in public administration and management designed to present and grapple with the range of the subject in an accessible but sophisticated form In doing so the volume seeks to fill the gap perceived to have opened up between the conventional comparative government literature and the new public management literature While the first part of the book explores the historical political and cultural context of public sector reform the second part deals more specifically with institutional developments and recent reform trends in the fields of social policy and social service delivery The volume analyzes the degree of convergence or divergence between the two countries with regard to public sector change

The UK Regional-National Economic Problem Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government *The Law of Municipal Corporations* Eugene McQuillin,1928
