Economic Growth and Environmental Quality in a Post-Pandemic World Muhammad Shahbaz, Daniel Balsalobre Lorente, Rajesh Sharma, 2023-07-28 In response to the damage caused by a growth led global economy researchers across the world started investigating the association between environmental pollution and its possible determinants using different models and techniques Most famously the environmental Kuznets curve hypothesizes an inverted U shaped association between environmental quality and gross domestic product GDP This book explores the latest literature on the environmental Kuznets curve including developments in the methodology the impacts of the pandemic and other recent findings Researchers have recently broadened the range of the list of drivers of environmental pollution under consideration which

now includes variables such as foreign direct investment trade expansion financial development human activities population growth and renewable and nonrenewable energy resources all of which vary across different countries and times And in addition to CO2 emissions other proxies for environmental quality such as water land and ecological footprints have been used in recent studies This book also incorporates analysis of the relationship between economic growth and the environment during the COVID 19 crisis presenting new empirical work on the impact of the pandemic on energy use the financial sector trade and tourism Collectively these developments have improved the direction and extent of the environmental Kuznets curve hypothesis and broadened the basket of dependent and independent variables which may be incorporated This book will be invaluable reading for researchers in environmental economics and econometrics **Public**

Finance and Economic Growth in Developing Countries Stephen Peterson, 2015-04-24 Public finance is crucial to a country's economic growth yet successful reform of public finances has been rare Ethiopia is an example of a country that undertook comprehensive reform of its core financial systems independent of the IMF and the World Bank and successfully transformed itself into one of the fastest growing economies in Africa With Ethiopia's twelve year reform as its guiding case study this book presents new analytical frameworks to help governments develop better financial reforms It shows in detail how four core financial systems budgeting accounting planning and financial information systems can be reformed One of the principal findings presented is that governments must establish basic public financial administration before moving to more sophisticated public financial management Other key findings include the identification of four strategies of reform recognize improve change and sustain the centrality of ongoing learning to the process of reform and the importance of government ownership of reform This book will be of interest to researchers and policymakers concerned with public finance developmental economics and African studies
