Slow Growth and the Service Economy Pascal Petit, 2013-11-07 The slow down in economic growth and the rise in unemployment in the 1970s revived some of the uncertainties experienced by industrialized economies during the inter war period After more than a decade of stagnation the period of sustained growth in the thirty years following the Second World War now seems increasingly to have been an exceptional phase in an overall development process still dominated by wide fluctuations in economic growth rates *Slow Growth and the Service Economy* examines what it means to live in a period of economic recession and analyses social patterns in response to the slowing down of financial and economic growth

Modeling Services Liberalization: The Case of Kenya David G. Tarr, *Technological Transformation in the Third World: Volume 1* Surendra J. Patel, 2018-03-26 Originally published in 1993 this book contains 4 studies on Asia Bangladesh India South Korea and Sri Lanka The studies reflect 4 different patterns of technological transformation India with its large population has made considerable progress but its overall development has been slow until recently At the other extreme South Korea which had a very low per capita income in the 1950s registered a quantum

leap in technological transformation within a short span of 30 years The heritage of Bangladesh's past has constrained its progress in overcoming structural weaknesses but in comparison Sri Lanka displays a very different pattern The sources used draw upon research in development economics economic history technology and studies in general and country studies in particular *Brazil in the Uruguay Round of the GATT* Ricardo Wahrendorff Caldas, 2018-12-14 First published in 1998 this volume analyses Brazil's strategy in the Uruguay Round focusing on the issue of services Three different moments were chosen for analysis The first was during discussions before the launch of the Uruguay Round During this period Brazil led the Less Developed Countries LDCs in obstructing the inclusion of services on the agenda The Second was during the launch of the Uruguay Round when Brazil persisted with this policy This second period is referred to as the initial position of Brazil in the Uruguay Round The third was Montreal in 1988 when Brazil supported the principles which guided an agreement on services After this turning point Brazil's position in the Round was increasingly supportive of an agreement not only in services but in all fields *Quantitative Tourism Research in Asia* Sajad Rezaei, 2018-12-14 The purpose of this book is twofold First this book is an attempt to map the state of quantitative research in Asian tourism and hospitality context and provide a detailed description of the design implementation application and challenges of quantitative methods in tourism in Asia Second this book aims to contribute to the tourism literature by discussing the past current and future quantitative data analysis methods The book offers new insights into well established research techniques such as regression analysis but goes beyond first generation data analysis techniques to introduce methods seldom if ever used in tourism and hospitality research In addition to investigating existing and novel research techniques the book suggests areas for future studies In order to achieve its objectives the analysis is split into three main sections understanding the tourism industry in Asia the current status of quantitative data analysis and future directions for Asian tourism research *Education and Gender Equality* Julia Wrigley, 2003-12-16 First Published in 1992 This book grew out of a special issue of the journal Sociology of Education There is no simple relation between education and gender equality As with social class relations schools both reinforce subordination and create new possibilities for liberation and these contradictions occur at every level and in every aspect of education Schools are sites of pervasive gender socialization but they offer girls a chance to use their brains and develop their skills To explore education and gender is to examine the bridge between the public world of occupations and the private world of families Schools link the families from which young children come and the sex and race segregated occupational worlds to which they are sent Because schools link public and private worlds help to form consciousness and structure inequalities there are many ways to look at gender and education In this book the chapters break into four major topic areas The first section analyzes gender and education from a comparative and historical perspective the second section on Diversity Social Control and Resistance in Classrooms third section on Gender and Knowledge and the final section on families and school *Inclusive Growth, Development and Welfare Policy* Reza Hasmath, 2015-02-20 The recent global

financial crisis has increased the scope of poverty and inequality The gap between the richest and poorest nations has become wider National income inequality has also been on the rise The prospect of a shift in designing and implementing development and welfare policies is strong in this new environment The neoliberal policies of the Washington Consensus are giving way to development models which look to a more active government role in both economic and social policies Meanwhile in the parallel universe of welfare policy a fundamental realignment is already taking place Faced with the current economic and social challenges policy communities have turned to a variety of instruments to ensure that growth and social inclusion go together This book offers a systematic analysis of the growing convergence on these matters in the development and welfare state literatures utilizing the experiences of a myriad of jurisdictions around the world Drawing upon the expertise of leading international policymakers practitioners and academics in the field this book critiques the theoretical underpinning of growth and development examine welfare state perspectives on inclusive growth and social economic development and presents lessons learned and best worst practices from the experiences of developing and developed nations
