**Grumman HU-16 Albatross** Charles Stafrace,2013      **The Design of Aircraft Landing Gear** Robert Kyle

Schmidt,2021-02-18 The aircraft landing gear and its associated systems represent a compelling design challenge simultaneously a system a structure and a machine it supports the aircraft on the ground absorbs landing and braking energy permits maneuvering and retracts to minimize aircraft drag Yet as it is not required during flight it also represents dead

weight and significant effort must be made to minimize its total mass

The Design of Aircraft Landing Gear written by R Kyle Schmidt PE B A Sc Mechanical Engineering M Sc Safety and Aircraft Accident Investigation Chairman of the SAE A 5 Committee on Aircraft Landing Gear is designed to guide the reader through the key principles of landing system design and to provide additional references when available Many problems which must be confronted have already been addressed by others in the past but the information is not known or shared leading to the observation that there are few new problems but many new people The Design of Aircraft Landing Gear is intended to share much of the existing information and provide avenues for further exploration The design of an aircraft and its associated systems including the landing system involves iterative loops as the impact of each modification to a system or component is evaluated against the whole It is rare to find that the lightest possible landing gear represents the best solution for the aircraft the lightest landing gear may require attachment structures which don t exist and which would require significant weight and compromise on the part of the airframe structure design With those requirements and compromises in mind The Design of Aircraft Landing Gear starts with the study of airfield compatibility aircraft stability on the ground the correct choice of tires followed by discussion of brakes wheels and brake control systems Various landing gear architectures are investigated together with the details of shock absorber designs Retraction kinematics and mechanisms are studied as well as possible actuation approaches Detailed information on the various hydraulic and electric services commonly found on aircraft and system elements such as dressings lighting and steering are also reviewed Detail design points the process of analysis and a review of the relevant requirements and regulations round out the book content The Design of Aircraft Landing Gear is a landmark work in the industry and a must read for any engineer interested in updating specific skills and students preparing for an exciting career *Grumman HU-16 "Albatross" ,1977*

**The Aviation History** Rely Victoria Petrescu, Florian Ion Petrescu, 2013 According to Aulus Gellius Archytas the Ancient Greek philosopher mathematician astronomer statesman and strategist was reputed to have designed and built around 400 BC the first artificial self propelled flying device a bird shaped model propelled by a jet of what was probably steam said to have actually flown some 200 metres This machine which its inventor called The Pigeon may have been suspended on a wire or pivot for its flight The 9th century Muslim Berber inventor Abbas Ibn Firnas s glider is considered by John Harding to be the first attempt at heavier than air flight in aviation history In 1010 AD an English monk Eilmer of Malmesbury purportedly piloted a primitive gliding craft from the tower of Malmesbury Abbey Eilmer was said to have flown over 200 yards 180 m before landing breaking both his legs He later remarked that the only reason he did not fly further was because he forgot to give it a tail and he was about to add one when his concerned Abbot forbade him any further experiments Bartolomeu de Gusmão Brazil and Portugal an experimenter with early airship designs In 1709 demonstrated a small airship model before the Portuguese court but never succeeded with a full scale model Pilâtre de Rozier Paris France first trip by a human in a free flying balloon the Montgolfière built by Joseph Michel and Jacques Étienne
