**The Economic Dimensions of National Security** Carl Richard Neu, Charles Wolf, United States. Department of Defense. Office of the Secretary of Defense, Rand Corporation, 1994 The end of the Cold War and the associated dramatic changes in the geopolitical environment have led many observers to conclude that much of our past thinking about U S national security interests and policies is now outmoded and that a fundamental rethinking of these interests and policies is required In particular the notion is becoming widespread that economic factors and concerns will play a more prominent role in defining and pursuing U S national security objectives The authors aim in convening the conference was to advance understanding of the emerging economic dimensions of U S national security policymaking The aim of this report is the same It is meant as a contribution to the task of defining a useful frame of reference for what will undoubtedly be a continuing discussion of the relation between economics and national security Although it is not intended as a summary of conference proceedings this report draws heavily on the ideas and hypotheses put forward during the conference In accordance with the ground rules established at the conference the authors have not attributed any of the ideas noted in this report to particular conference participants They have tried to retain the exploratory and speculative tone of the conference discussions
