Economic Theory of Regulatory Constraint Elizabeth E. Bailey, 1973 **Economic Theory of Regulatory Constraint**
[By] **Elizabeth E. Bailey** Elizabeth E. Bailey, 1973 **A Theory of Incentives in Procurement and Regulation**
Jean-Jacques Laffont, Jean Tirole, 1993 Based on their work in the application of principal agent theory to questions of regulation Laffont and Tirole develop a synthetic approach to this field focusing on the regulation of natural monopolies such as military contractors utility companies and transportation authorities **The Economics of Public Utility Regulation**
Michael A. Crew, Paul R. Kleindorfer, 1986-06-18 **The Economics of Environmental Regulation** Wallace E. Oates, 1996-03 The Economics of Environmental Regulation is an excellent book provides the reader with copies of some of the most important papers in the field Wallace Oates writes well and there is great scope to his interests his flexibility as an economist is witnessed by the fact that an earlier volume in the Great Economists series collects his pioneering contributions in the field of local government finance Everything he writes is underpinned by firm theoretical rigour Anthony Heyes The Journal of Energy Literature Environmental regulation and policy making are increasingly influenced by economic considerations Over the past 30 years Wallace E Oates has been closely involved in the development of environmental economics as a distinct and vital field for theoretical study applied research and policy prescription Drawing key papers together in a systematic fashion Professor Oates s collection begins with thoughtful overviews of the field and then continues with discussion of specific issues Among the topics addressed are instruments for environmental regulation the use of fees and taxes emission permits environmental federalism and global environmental management **Leading Issues in Competition, Regulation, and Development** Paul Cook, 2004-01-01 The promotion of liberalized and deregulated markets by bilateral and multilateral aid donors and by global institutions such as the WTO has led to significant attention being paid to competition and regulatory reforms in developing economies The process of reform involves the transfer and diffusion of market models derived from practice and theory in developed countries However in developing countries regulation needs to do more than simply promote competitiveness and consumer interests it also needs to ensure that the market nurtures development By rigorously examining the numerous impacts of regulation this book will help to fill a significant gap in the literature on economic and social development The book now available in paperback draws together contributions from leading experts across a range of disciplines including economics law politics and governance public management and business management The authors begin with an extensive overview of the issues of regulation and competition in developing countries and carefully illustrate the important themes and concepts involved Using a variety of country and sector case studies they move on to focus on the problems of applicability and adaptation that are experienced in the process of transferring best practice policy models from developed to developing countries The book presents a clear agenda for further empirical research and is notable for its rigorous exploration of the links between theory and practice Although there

is substantial interest in competition and regulation as yet there has been relatively little investigation of these issues in developing economies This book redresses the balance and will be a valuable resource for researchers academics teachers and students interested in development economics and development studies It will also be of great relevance for practitioners and policymakers working in the fields of competition policy and regulatory reform
