Economics A Programmed Approach:

The Programming Approach and the Demise of Economics Franco Archibugi, 2019-11-21 This trilogy deals with an epistemology of economics arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences based not on positivism but on a normative and programming paradigm Volume II builds on the work presented in Volume I to explore oppositions to the traditional and conventional teaching of economics and presents testimonies that are favourable to a trend towards a programming approach thereby giving substance to the epistemological overturning of conventional analysis Such oppositions studied include the work of Ludvig von Mises and his theory of praxeology Ian Tinbergen and Wassily Leontief's preference for planning over forecasting science Bruno de Finetti and Daniel Bell's support for the base of utopia in economics the trend from the theory of planning towards the methodology of planning by Andreas Faludi neoclassic curiosity about the multi purposes approach and non economic commodities as investigated by Walter Isard as well as theories expressed by Herbert Simon Robert Lucas George Soros and Mark Blaug Volume III takes studies further and presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences

Stochastic Economics Gerhard Tintner, Jati K. Sengupta, 2014-05-10 Stochastic Economics Stochastic Processes Control and Programming presents some aspects of economics from a stochastic or probabilistic point of view The application of stochastic processes to the theory of economic development stochastic control theory and various aspects of stochastic programming is discussed Comprised of four chapters this book begins with a short survey of the stochastic view in economics followed by a discussion on discrete and continuous stochastic models of economic development The next chapter focuses on methods of stochastic control and their application to dynamic economic models with emphasis on those aspects connected especially with the theory of quantitative economic policy Some basic operational problems of applying stochastic control particularly in economic systems and organizations for problems such as dynamic resource allocation growth planning and economic coordination are considered The last chapter is devoted to stochastic programming paying particular attention to the decision rule theory of operations research under the chance constrained model and a method of incorporating reliability measures into a systems reliability model This book will be of interest to economists statisticians applied mathematicians operations researchers and systems engineers

Evolutionary Economics: Program and Scope Kurt Dopfer, 2001-06-30 Eleven papers written by economists from Europe and the US address the paradigmatic foundations and basic theoretical propositions of economics Contributions address foundational issues including an interpretive survey looking at the most important contributions of modern evolutionary economics and the ontological basis of evolutionary economics Next evolutionary macroeconomics is addressed including issues relating to evolutionary macrostatics and evolutionary macrodynamics Evolutionary

microeconomics is next featured in essays addressing the dynamic aspects of an evolutionary microdynamics Other topics include early signs of a revolution in microeconomics and the reconstruction of major evolutionary theories of the firm with relation to transaction and contract theories c Book News Inc

Linear Programming and Economic Analysis Robert Dorfman,Paul A. Samuelson,Robert M. Solow,2012-10-10 Designed primarily for economists and those interested in management economics who are not necessarily accomplished mathematicians this text offers a clear concise exposition of the relationship of linear programming to standard economic analysis The research and writing were supported by The RAND Corporation in the late 1950s Linear programming has been one of the most important postwar developments in economic theory but until publication of the present volume no text offered a comprehensive treatment of the many facets of the relationship of linear programming to traditional economic theory This book was the first to provide a wide ranging survey of such important aspects of the topic as the interrelations between the celebrated von Neumann theory of games and linear programming and the relationship between game theory and the traditional economic theories of duopoly and bilateral monopoly Modern economists will especially appreciate the treatment of the connection between linear programming and modern welfare economics and the insights that linear programming gives into the determinateness of Walrasian equilibrium The book also offers an excellent introduction to the important Leontief theory of input output as well as extensive treatment of the problems of dynamic linear programming Successfully used for three decades in graduate economics courses this book stresses practical problems and specifies important concrete applications

Biodiversity Economics Andreas Kontoleon,Unai Pascual,Timothy Swanson,2007-12-13 Human induced biodiversity loss is greater now than at any time in human history with extinctions occurring at rates hundreds of times higher than background extinction levels The field of biodiversity economics analyses the socio economic causes of and solutions to biodiversity loss by combining the disciplines of economics ecology and biology This field has shown a remarkable degree of transformation over the past four decades and now incorporates the analysis of the entire diversity of biological resources within the living world Biodiversity Economics presents a series of papers that show how bio economic analysis can be applied to the examination and evaluation of the problem of various forms of biodiversity loss Containing insightful bio economic research by some of prominent practitioners in the field this volume will be an essential research tool to those working on biodiversity issues in the academic policy and private sectors
