rethink at the broadest levels existing business strategies approaches and practices Over the past decade IT has opened up new business opportunities led to the development of new strategic IS and challenged all managers and users of ISIIT to devise new ways to make better use of information Yet this era which began with much confidence and optimism is now suffering under a legacy of systems that are increasingly failing to meet business needs and lasting fixes are proving costly and difficult to implement General management is experiencing a crisis of confidence in their IS functions and in the chief information systems officers who lead them Earl and Feeney 1994 11 The concern for chief executive officers is that they are confronting a situation that is seemingly out of control They are asking What is the best way to rein in these problems and effectively assess IS performance Further how can we be certain that IS is adequately adding value to the organisational bottom line On the other hand IS executives and professionals who are responsible for creating managing and maintaining the organisation s systems are worried about the preparedness of general managers to cope with the growth in new technologies and systems They see IT having a polarising effect on general managers it either bedazzles or frightens them Davenport 1994 119
