Ecosystem And Egosystem Evolution:

Ecosystem and Egosystem Evolution Valentin Abramovich Krasilov, 1995 **Angiosperm Origins** Valentin A. Krassilov, 1997 **FinTech Revolution** Sofie Blakstad, Robert Allen, 2018-06-06 This book is a practical guide to the evolving landscape of finance highlighting how it's changing our relationship with money and how financial technology together with macroeconomic and societal change is rewriting the story of how business is done in developing economies. Financial services companies are trying to become more customer focused but struggling to help huge customer segments particularly in developing economies. Alternative financial models and tools are emerging which are being embraced by consumers and incumbents. In large parts of the developing world alternative services are leapfrogging traditional finance meaning more and more people have access to finance without ever needing a bank. Meanwhile the barriers around financial services companies are crumbling as they become more reliant on integration with new providers and alternative types of service. Financial products can no longer be viewed in isolation but as part of a service landscape that supports how people do life. This means rethinking how our businesses are designed, motivated and organised and letting go of the old ways of thinking about supply and demand. With practical steps businesses and in particular financial services organisations need to take to participate in a global service ecosystem, this book will be of interest to financial professionals who work in banking, financial technology and development finance.

Proceedings of the 2019 International Conference of The Computational Social Science Society of the Americas Zining Yang, Elizabeth von Briesen, 2021-10-02 This book presents the latest research into CSS methods, uses and results as presented at the 2019 annual conference of the CSSSA. This conference was held in Santa Fe, New Mexico, October 24-27, 2019, at the Drury Plaza Hotel. What follows is a diverse representation of new results and approaches for using the tools of CSS and agent-based modeling (ABM) for exploring complex phenomena across many different domains. Readers will therefore not only have the results of these specific projects on which to build but will also gain a greater appreciation for the broad scope of CSS and have a wealth of case study examples that can serve as meaningful exemplars for new research projects and activities. The Computational Social Science Society of the Americas (CSSSA) is a professional society that aims to advance the field of CSS in all its areas, from fundamental principles to real-world applications, by holding conferences and workshops, promoting standards of scientific excellence in research and teaching, and publishing novel research findings.

Terrestrial Palaeoecology and Global Change Valentin Abramovich Krasilov, 2003 This book critically evaluates the currently popular ideas of global change based on the plate tectonics extraterrestrial impacts greenhouse warming etc and offers alternative models Krasilov presents ecosystem evolution as a sustainability oriented process with an increase in the biomass to dead mass ratio as a measure of progress This general tendency is reversed by the geobiospheric crises starting in the earth's interior and surfacing as the concerted geomagnetic tectonomagmatic geochemical and climatic events These affect biota through turnovers of biotic communities and the adequate changes in population adaptive strategies a major force under the species originations and extinctions as well as the genomic evolution The evolution of humans is envisaged as guiding this species to the role of the earth's custodian The book is important for evolutionists ecologists geologists climatologists geneticists integrative biologists botanists zoologists and the general educated person who is intrigued by the dynamic historical processes which shape the evolution of biosphere It could be used as a course book for undergraduate and graduate studies and is an excellent example of inspiring and creative interdisciplinary research of our planet Valentin Krasilov is the author of 20 books among them the Palaeoecology of Terrestrial Plants Cretaceous Period Angiosperm Origins Ecosystem and Ecosystem Evolution etc The new book is based on his lifetime experience in the fields of palaeobotany palaeoecology structural geology and evolutionary biology

Moving Beyond Self-Interest Stephanie L. Brown, R. Michael Brown, Louis A. Penner, 2012 Moving Beyond Self Interest is an interdisciplinary volume that discusses cutting edge developments in the science of caring for and helping others In Part I contributors raise foundational issues related to human caregiving They present new theories and data to show how natural selection might have shaped a genuinely altruistic drive to benefit others how this drive intersects with the attachment and caregiving systems and how it emerges from a broader social engagement system made possible by symbiotic regulation of autonomic physiological states In Part II contributors propose a new neurophysiological model of the human caregiving system and present arguments and evidence to show how mammalian neural circuitry that supports parenting might be recruited to direct human cooperation and competition human empathy and parental and romantic love Part III is devoted to the psychology of human caregiving Some contributors in this section show how an evolutionary perspective helps us better understand parental investment in and empathic concern for children at risk for or suffering from various health behavioral and cognitive problems Other contributors identify circumstances that differentially predict caregiver benefits and costs and raise the question of whether extreme levels of compassion are actually pathological The section concludes with a discussion of semantic and conceptual obstacles to the scientific investigation of caregiving Part IV focuses on possible interfaces between new models of caregiving motivation and economics political science and social policy development In this section

contributors show how the new theory and research discussed in this volume can inform our understanding of economic utility policies for delivering social services such as health care and education and hypotheses concerning the origins and development of human society including some of its more problematic features of nationalism conflict and war The chapters in this volume help readers appreciate the human capacity for engaging in altruistic acts on both a small and large scale
