 book collects for the first time in one volume contributions honoring Professor Raymond Smullyan's work on self reference. It
 serves not only as a tribute to one of the great thinkers in logic but also as a celebration of self reference in general to be
 enjoyed by all lovers of this field. Raymond Smullyan, mathematician, philosopher, musician, and inventor of logic puzzles, made
 a lasting impact on the study of mathematical logic. Accordingly, this book spans the many personalities through which
 Professor Smullyan operated, offering extensions and re-evaluations of his academic work on self reference, applying self
 referential logic to art and nature, and lastly offering new puzzles designed to communicate otherwise esoteric concepts in
 mathematical logic in the manner for which Professor Smullyan was so well known. This book is suitable for students, scholars,
 and logicians who are interested in learning more about Raymond Smullyan's work and life. Reference and Information
Services Richard E. Bopp, Linda C. Smith, 2011-05-23 Reflecting the dramatic changes shaped by rapidly developing
 technologies over the past six years, this new fourth edition of *Reference and Information Services* takes the introduction to
 reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes,
 chapters have been revised and updated to reflect new ideas and methods in the provision of reference service in an era
 when many users have access to the Web. In Part II, Information Sources and Their Use, discussion of each source type has
 been updated to encompass key resources in print and on the Web where an increasing number of freely available sources
 join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their
 chapters their experience as teachers of reference and as practitioners in different types of libraries. Discussions of services
 in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using
 instant messaging. Boxes interspersed in the text are used to present scenarios for discussion to highlight key concepts or to
 present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective
 search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the
 changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated
 list of additional readings to guide further study. A new companion website will provide links to Web accessible readings and
 resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the
 text. *Nuclear Energy ebook Collection* Gianni Petrangeli, Raymond L. Murray, Colin Bayliss, Galen J. Suppes, Elmer E.
