**Triple Entendre** Herve Vanel, 2013-11-15 Triple Entendre discusses the rise and spread of background music in contexts as diverse as office workplaces shopping malls and musical performance Herv Vanel examines background music in several guises beginning with Erik Satie s Furniture Music of the late 1910s and early 1920s which first demonstrated the idea of a music not meant to be listened to and was later considered a precedent to modern functional background music Vanel argues that when the Muzak Corporation s commercialized ambient music became a predominant feature of modern life in the 1940s both as a brand and a genre of background music it also became a powerful instrument of social engineering in an advanced capitalist society Different kinds of music were developed to encourage or incite greater productivity in the workplace more

energetic shopping or more animated socializing Vanel's discussion culminates in the creative response of the composer John Cage to the pervasiveness and power of background music in contemporary society Cage neither opposed nor rejected Muzak but literally answered its challenge by formulating a parallel concept that he called Muzak Plus Forty years after Satie presented his work to general critical puzzlement Cage saw how background music could be combined with mid century technology and theories of art and performance to create a participatory soundscape on a scale that Satie could not have envisioned again reconfiguring the listener's stance to music By examining the subterranean connections existing between these three formulations of a singular idea Triple Entendre analyzes and challenges the crucial boundary that separates an artistic concept from its actual implementation in life
