Willrich, George Edward Smith, 1971 SEDIMENT AS A WATER POLLUTANT PLANT NUTRIENTS AS WATER POLLUTANTS PESTICIDES AS WATER POLLUTANTS ANIMAL WASTES AS WATER POLLUTANTS AGRICULTURAL POLLUTION IMPLICATIONS AGRICULTURE S INVOLVEMENT IN POLLUTED AND CLEAN WATER *Groundwater Management in the West* Jeffrey S. Ashley, Zachary Alden Smith, 1999-01-01 One of the greatest conundrums facing the arid western United States is the availability use and quality of groundwater In large sections of the West groundwater is the only dependable source of water for agricultural production and home consumption Yet many of the aquifers are being depleted at a rate that will suck them dry within a century Furthermore dependence upon groundwater in many areas will only increase in the future This dependence is already having serious consequences for small towns on the Great Plains Faced with growing costs associated with deeper wells and the need for ever more advanced technology for extracting water these towns find they lack the resources to maintain current agricultural practices In this timely assessment of the West s groundwater resources the authors provide a detailed overview of groundwater management in the Western states The authors present for each state the various management strategies laws and political realities that have made groundwater appropriation such a volatile subject They also suggest possible difficulties that states and regions might face under current groundwater policies By examining separate cases and viewing the West as a whole the authors are able to identify not only the most pressing problems but also the most appropriate management techniques for protecting water supplies for future use *Agricultural Threats to Groundwater Quality* L. Candela, A. actions by policy makers to address water quality issues in agriculture and provides a set of recommendations for countries to meet the challenge of improving agricultural water quality

Federal Ground-water Science and Technology Programs ,1992 *Agricultural Use of Groundwater* Cesare Dosi,2001-05-31 Groundwater is endangered and polluted in several ways Conservation and better management of this invisible resource should be a key ingredient of sustainable water policies This is especially true in areas such as many Mediterranean regions which are already exposed to scarcity problems and which are likely to experience increasing competition between freshwater uses and users Agriculture is an important user of groundwater not only in terms of abstractions but also in terms of generation and release of pollutants Agricultural policies traditionally directed towards other objectives are beginning to pay more attention to environmental considerations However more effective initiatives are required to reduce the pressure upon groundwater resources and to achieve a better integration between agricultural and environmental policies This book has been developed from three workshops held as part of the EU Concerted Action SAGA Sustainable Agricultural Use of Aquifers in Southern Europe Integration between Agricultural and Water Management Policies FAIR5 CT97 3673 The Concerted Action and the workshops brought together researchers working in different but complementary fields in order to get a picture of the state of the art about interlinkages between agriculture and groundwater as well a critical review of alternative regulatory approaches and policy instruments aimed at improving groundwater management
