Groundworks Algebraic Thinking Grade 1:

Groundworks Carole E. Greenes, Carol R. Findell, 1999 Navigating Through Problem Solving and Reasoning in Grade 1 Carol R. Findell, Carole E. Greenes, 2004 The explorations in this book include such tasks as supplying missing numbers in story problems using clues to identify locations on a map and placing shapes inside or outside a circle according to a rule Students apply mathematical ideas from the five main content areas number algebra geometry measurement and data analysis As they work they infer generalise reason by analogy recognise relationships and make representations and they also guess check and revise and verify their results The supplemental CD ROM features interactive electronic activities master copies of activity pages for students and additional readings for teachers **Teaching Children Mathematics**, 2001 **ENC Focus Review**, 2003 **Number Sense Routines** Jessica F. Shumway, 2011 Just as athletes stretch their muscles before every game and musicians play scales to keep their technique in tune mathematical thinkers and problem solvers can benefit from daily warm up exercises Jessica Shumway has developed a series of routines designed to help young students internalize and deepen their facility with numbers The daily use of these quick five ten or fifteen minute experiences at the beginning of math class will help build students number sense Students with strong number sense understand numbers ways to represent numbers relationships among numbers and number systems They make reasonable estimates compute fluently use reasoning strategies e g relate operations such as addition and subtraction to each other and use visual models based on their number sense to solve problems Students who never develop strong number sense will struggle with nearly all mathematical strands from measurement and geometry to data and equations In *Number Sense Routines* Jessica shows that number sense can be taught to all students Dozens of classroom examples including conversations among students engaging in number sense routines illustrate how the routines work how children s number sense develops and how to implement responsive routines Additionally teachers will gain a deeper understanding of the underlying math the big ideas skills and strategies children learn as they develop numerical literacy **Navigating Through Problem Solving and Reasoning in Grade 2** Marian Small, Carole E. Greenes, 2004 The explorations in this book include such tasks as determining the coins in piggy banks matching two dimensional shapes with three dimensional solids and organising data about hats in tree diagrams Students apply mathematical ideas from the five main content areas number algebra geometry measurement and data analysis As they work they infer generalise reason by analogy recognise relationships and make representations and they also guess check and revise and verify their results The supplemental CD ROM features interactive electronic activities master copies of activity pages for students and additional readings for teachers *Navigating Through Algebra in Prekindergarten- Grade 2* Carole E. Greenes, 2001 CD ROM contains Blackline masters for some of the activities illustrated in text Two applets for students to manipulate Resources for professional development **Enriching Your Math Curriculum** Lainie Schuster, 2010 Presents practices and routines designed to support and nourish teachers as they prepare

and present a meaningful year of mathematics instruction for fifth grade mathematicians Offers activities lessons and narration that can be easily adapted or adjusted to fit the particular needs of the students or the requirements of a prescribed curriculum

Navigating Through Problem Solving and Reasoning in Prekindergarten-kindergarten

Carole E. Greenes,2003 The investigations for prekindergarten and kindergarten contained in this book engage students in such activities as creating story problems about teddy bears examining patterns of fire trucks and firefighters hats and making glyphs to represent data about children in the class Students apply mathematical ideas from the five main content areas number algebra geometry measurement and data analysis As they work they infer generalise reason by analogy recognise relationships and make representations and they also guess check and revise and verify their results The supplemental CD ROM features interactive electronic activities master copies of activity pages for students and additional readings for teachers
