Kalinichenko, Tamer Özsu, Amit Sheth, 2012-12-06 Workflow management systems WFMS are enjoying increasing popularity due to their ability to coordinate and streamline complex organizational processes within organizations of all sizes Organizational processes are descriptions of an organization's activities engineered to fulfill its mission such as completing a business contract or satisfying a specific customer request Gaining control of these processes allows an organization to

reengineer and improve each process or adapt them to changing requirements The goal of WFMSs is to manage these organizational processes and coordinate their execution was demonstrated in the first half The high degree of interest in WFMSs of the 1990s by a significant increase in the number of commercial products once estimated to about 250 and the estimated market size in combined 2 billion in 1996 Ensuing maturity product sales and services of about is demonstrated by consolidations during the last year Ranging from mere e mail based calendar tools and flow charting tools to very sophisticated integrated development environments for distributed enterprise wide applications and systems to support programming in the large these products are finding an eager market and opening up important research and development opportunities In spite of their early success in the market place however the current generation of systems can benefit from further research and development especially for increasingly complex and mission critical applications

Workgroup Computing Alan R. Simon, William Marion, 1996 Workflow computing and workgroup computing are two environments designed to provide dramatic productivity enhancements for organizations but are delicate to implement This book shows IS managers CIOs systems designers and applications designers how to unlock workgroup architectures and lock in productivity gains in their information systems

Wide Area Workflow Management Gerold Riempp, 2012-12-06 In this volume Gerold Riempp examines the interaction of different workflow management systems WFMS in geographically distributed and legally separate organisations This is an emerging field of research known as Wide Area Workflow Management WAWM He examines the technical and managerial aspects of workflow management via a framework which he has developed to describe the problems involved in WAWM and to find viable solutions Based on this theoretical framework the author also develops a prototype software framework the Wide Area GroupFlow System to demonstrate the solutions via practical software tools The tools will be available to the reader via the WWW Also included are the results of case studies from some of the 15 developers who have been using this software over the past two years

Doing Business on the Internet Fay Sudweeks, Celia T. Romm, 2012-12-06

FAY SUDWEEKS AND CELIA ROMM At the turn of the twenty first century global communication is changing the fabric of society at a rate never experienced before The Internet in particular has redrawn the map of global economy To be competitive in today's marketplace companies need to expand commercial activities beyond national borders The global network of electronic infrastructure has played a significant role in this expansion but the technology itself is not the factor driving the business revolution The changes are driven by the interaction of information technology and customer demand Customers are not only adapting to new technologies they are demanding more and more global competition Electronic commerce therefore is arguably the most important economic trend of our time Its presence on the Internet in particular is becoming crucial to the effective functioning of organisations especially in a world where companies need to deal with suppliers customers partners and their own units distributed across the world A global business industry created by the Internet is no longer a projected vision of technocrats it is a reality The Internet is already playing a

significant role in determining corporate strategy and in creating values Advances in Web-Age Information Management
