Structural Safety Early Warning and Treatment Technology of Metro Tunnel in Soft Soils Rulu Wang, Dongmei Zhang, Chunsheng Guo, Jingya Yan, 2025-08-22 This book mainly focuses on two topics The early warning system of the metro structural safety which includes the monitoring system and inspection system The treatment technology for the tunnel disease In the discussion of the early warning system several advanced sensing technologies were introduced which could easily and rapidly detect the potential diseases of the tunnel lining structure Meanwhile in the discussion of the treatment technology for the structural problems several reinforcement measures were introduced in details and corresponding application cases in East China were put out to verify the effects of the measures From this book practitioners in the maintenance and repair of metro structures could learn the deformation mechanisms and help address the practical issues they encounter

Key Technologies for Safety Construction of Mined Subsea Tunnels Dingli Zhang, 2023-03-16 This book puts forward a technological system for the construction of subsea tunnel using drilling and blasting method Taking the water induced disaster as the core risk the safety guarantee system for large cross sectional subsea tunnels is established The composite grouting technology referred to ground reinforcement and water plugging is established which breaks through the technical bottleneck of subsea tunnel construction in highly permeable strata The process control theory based on water inrush mechanism is created which gets rid of the over dependence on engineering

experience for disaster control of submarine tunnel An active control waterproof drainage system based on the synergy of reinforcement ring and support system is invented to solve the contradiction between the control of water displacement and water pressure The above mentioned achievements have been successfully applied in the first three large cross sectional subsea tunnels in China and have played a key role in the construction safety The proposed technological system can improve the overall construction level of subsea tunnel which can provide reference for the design and construction of subsea tunnels especially for those crossing through weakness zones Advances in Spatio-Temporal Analysis Xinming Tang,Yaolin Liu,Jixian Zhang,Wolfgang Kainz,2007-08-23 Developments in Geographic Information Technology have raised the expectations of users A static map is no longer enough there is now demand for a dynamic representation Time is of great importance when operating on real world geographical phenomena especially when these are dynamic Researchers in the field of Temporal Geographical Information Systems TGIS have been developing methods of incorporating time into geographical information systems Spatio temporal analysis embodies spatial modelling spatio temporal modelling and spatial reasoning and data mining Advances in Spatio Temporal Analysis contributes to the field of spatio temporal analysis presenting innovative ideas and examples that reflect current progress and achievements Wiley's Remediation Technologies Handbook Jay H.
