Grow Or Die George Land, 1997-12-01 Chosen as an outstanding selection for The Saturday Review's Science Book Club Dr George Land's GROW OR DIE is sending shock waves through the worlds of Psychology Medicine Biology Education Dr Land dons the hat of both scientist philosopher to ingeniously demonstrate the vital nature of growth the startling idea that species adapt their environments to themselves rather than adapting themselves to their environments The author's Transformation Theory is lauded as brilliant by experts in every field of natural social science Dr Margaret Mead finds it a magnificent synthesis that deals with the question of cultural change in evolutionary terms more effectively than any other And Dr Karl Menninger calls it an intriguing effort to formulate a general systems theory or application of it to all world phenomena a broadening horizon raising line of thought Through the vehicle of this well written book with its original important concepts interdisciplinary approach we may at last comprehend our own dichotomous nature our place in the universe This controversial book will be widely discussed hotly debated To order Creative Education Foundation *Grow Or Die* George T. Lock Land, 1978 *Grow Or Die* George T. Ainsworth-Land, 1973 Hearings, Reports and Prints of the House Committee on Interstate and Foreign Commerce United States. Congress. House. Committee on Interstate and Foreign Commerce, 1976 Middle, and Long-term Energy Policies and Alternatives United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Energy and Power, 1976 **End of Days?** John O. Hunter, 2018-09-21 In Part one Dr Hunter looks back at the massive shift in our morals during the 20th century with a nostalgic appreciation for the past He describes the power of propaganda and Orwellian influence as well as the power of art and literature to defeat the lie with specific reference to artists such as Alexander Solzhenitsyn While the author expresses concern about the present his Christian faith and knowledge of artificial intelligence make him a believer in our future The stage is set for the next stage of evolution If the next generation can team up with thinking machines there is possibility to reach a higher spiritual and material ground than we've ever known before Part two Is an historical and philosophical exploration of sacred texts primarily those dealing with Christianity but also including Eastern religions such as Buddhism Major emphasis is on the work of St Paul The influence of modern social science such as Organization and Community Development as well our longstanding problem of racial turmoil is a major focus The social impact of America's peculiar institution slavery and of black leaders Malcolm X and Martin Luther King Jr are highlighted Teaching Business Sustainability Chris Galea, 2017-11-28 In a world where corporate governance scandals have become the everyday the role of business schools in producing the managers of today and tomorrow has come into sharp focus Today's managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum As some but by no means all organisations are coming to realise bad performance in environmental protection labour practices and human rights is no longer a soft issue but one that can hit the

bottom line with a vengeance So what is the state of the art in teaching business sustainability worldwide and what teaching practices and tools are achieving successful results This book begins to answer these questions and more There are many challenges facing educators in the field of sustainability It is an evolving field still in its infancy as a management discipline and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non valued added effort Teaching Business Sustainability acknowledges this problem while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value added practical outcomes A wide mix of approaches is therefore indicated while many of these are experimental and on the leading edge of management learning they all share an experiential and often a team based element and attempt to bring together the theory in a way that makes it relevant to practitioners in the field The implication is that whenever possible educators need to link the learning to the students immediate and pressing real world realities This applies equally to undergraduates or high level executives However in the absence of immediate examples of such realities as may often be the case in undergraduate settings educators need to introduce experientially based approaches that recreate such settings in the classroom The book also argues the case for holistic and interdisciplinary learning It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business Indeed it goes beyond just business learning to encompass many fields such as ecology engineering and biology If students are to move beyond the narrow perspective that conventional business studies often entail they need to be introduced to the wider vision that an interdisciplinary approach engenders The final point that emerges from this collection is that experiential learning of business sustainability often can and should be fun Be it a heated exchange in a case study discussion a role play exercise or a hands on student consulting project much experiential learning seems to excite the imagination of the students and to release their creative juices The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups In the first section Theory Critique and Ideas the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability The next section Learning from Current Practice contains the experiences of a number of educators and the successful and leading edge approaches that they have used The final section then outlines tools methods and approaches that can be used to teach business sustainability This last section also serves as an introduction to a second volume Teaching Business Sustainability Vol 2 which provides educators of sustainability with a series of case studies role plays and experiential exercises Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines looking for inspiration and guidance on how to teach business sustainability as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues

*Developing and Sustaining Adult Learners*  
Carrie J. Boden, Kathleen P. King, 2013-10-01

Developing and Sustaining Adult Learners is the second volume in a series of

scholarly publications associated with the annual Adult Higher Education Alliance AHEA The Alliance conference The title of this volume derived from the theme of the 2012 conference co sponsored by American Association of Adult and Continuing Education AAACE in Las Vegas NV encompasses significant issues and questions at the forefront of the field of adult education At the conference scholars practitioners and adult educators gave presentations and received feedback on some of the most significant and timely issues in their praxis The Alliance which values collaboration transformative dialogue and collegiality among professionals considers this volume a continuation of those conversations as the presentations were expanded into chapters We are glad that you are joining the conversation This volume confirms not only that adult learning higher education and both fields of research have many contexts but also that there is so much more to learn about different perspectives and opportunities for research and practice Opportunities for symbiotic relationship abound We hope that *Developing and Sustaining Adult Learners* will be a book that you pull off your bookshelf or open in your e reader often We know that as we engage in program and course planning design and teaching this book will provide needed refreshment and new vision When research ideas seem too similar this volume will also provide many seeds for new opportunities

**Between Two Worlds** Lynton Keith Caldwell, 1992-01-23 The focus of this book is on changes in the human situation wrought by unprecedented changes in science based technology and expanding populations Increasing scientific information concerning these changes and their consequences is beginning to alter people's perceptions thus providing a rational basis for a worldwide environmental movement This movement complex and differentiated works through political and educational means to establish new social priorities consistent with scientific findings and the sustainability of life on Earth The success of this effort would signify a new phase of social development The thesis of this book is that human made changes in the condition of the Earth accompanied by the changing attitudes and values implicit in the environmental movement constitute an historical discontinuity The present era represents a transition between the assumptions and conditions that have hitherto characterized the modern world and those of the post modern world that is emerging Science and technology so vividly symbolized in the view from outer space are fundamentally changing our traditional beliefs about human opportunities and limitations and these changes are slowly being reflected in international policies and laws If humanity today succeeds in establishing a sustainable relationship to Earth a higher level of civilisation will have been achieved This thought provoking view will interest students and professionals in the science and politics of the environment *The World's Fearlessness Teachings* R. Michael Fisher, 2010 *The World's Fearlessness Teachings* addresses the human fear problem in a truly unique and insightful way summarizing the teaching on fearlessness from around the world and throughout history The author then utilizes critical integral theory a la Wilber as an approach to categorize the developmental and evolutionary spectrum of fear management systems known thus far The author has spent twenty years researching the timely topic of fear and how to best manage and transform it From this experience he offers an educational healing vision to address the challenges of a

dangerous 21st century Fear's empire has taken rule It is time to resist it using the best intelligence from both sacred and secular traditions as well as the transformational theories humanity has to offer R Michael Fisher maps out ten fear management systems that will benefit future positive leaders everywhere Book jacket

Enough! Laurie McCammon, 2016-04-01 Rediscover your self worth boost your self confidence and develop a sense of enoughness that can improve your life and the world around you Do you like so many of us believe that you will never have enough time money talent or love to truly be happy Do you think you're not good enough not rich enough or thin enough or smart enough to have the life you want Or that problems in your community or the world

around you could be solved if only there were more to go around Everywhere all the time we get this message that there is something lacking something more something better to strive for In fact the idea that there isn't enough or you aren't enough is so deeply ingrained in us and into our culture that it holds sway over almost every aspect of our lives from how we perceive our self worth and our skills as parents friends and partners I am not enough to the ways in which we are taught and governed Author and activist Laurie McCammon wrote this book to show that that is all a lie Discover how your own never enough thinking has been limiting you and how to challenge it in all the places it lurks Let Laurie show you how to develop a sense of enoughness that can change not only how you feel about yourself but how you view time your relationships your work and the possibilities for helping to shape a better you and a better world Praise for Enough Like a breath of fresh air along comes Laurie McCammon's marvelous book to show us just how we got into too much and all its consequences and just how simple it is to get off the roller coaster and into a more peaceful and loving life ride This book is a must for a saner and more caring future Elisabet Sahtouris PhD evolutionary biologist and futurist author of EarthDance and Gaia's Dance

*Solar Architecture* United States. Energy Research and Development Administration, 1976 *In Restraint of Trade* Butler D. Shaffer, 1997 What emerges from this book is an awareness that the relationship between government and business has been far more symbiotic than adversarial in the years following World War I and that government regulatory practices have served the needs of the business community far more than the interests of the public Stop the Scale Kirk Williams, 2022-05-01 How much revenue growth did your agency see last year How many new employees were added to your team How fast have you grown in the past four years Get a few digital agency owners together and these questions will all be asked within the first 30 seconds of the meet and greet if not sooner But what if these are the wrong questions on which to be focused What if the way you think about growth personal fulfillment and how you lead your agency doesn't need to center around revenue or employee headcount growth If you are getting exhausted by the endless emphasis on revenue or employee growth as the assumed primary goal of every agency owner then this book is for you It is a clarion call for agency owners to stop chasing unicorn like growth and instead focus on serving their clients employees friends family neighbors and thus make an indelible imprint on the world This book is not anti growth but it does offer an alternate path for the over worked agency owner **The Brain, Education, and the Competitive Edge** Geoffrey Caine, Renate Nummela Caine, 2001-09-10 Everyone agrees that improving education is vital but people disagree on what to do Business parents politicians the media and educators all voice strong and conflicting opinions The public needs to have the issues clarified and to see a path that will work There ARE ways to raise standards but most current education reform is moving in precisely the wrong direction The key to higher test results is to teach so that students can show what they know through real world performance Read this book to discover what does and does not work at every grade level and learn what actions you can take Features Sheds light on the competing points of view Explains how traditional teaching testing and schooling developed Describes a more

powerful approach to education that engages student brains much more effectively Shows how great schools and ordinary people from around the world use this guided experience approach Explains why public education resists change no matter what research proves      *The Fourth Wave* Herman Maynard, Susan E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change *The Fourth Wave* examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees
