The recent explosion in population ageing across the globe represents one of the most remarkable demographic changes in human history Population ageing will profoundly affect families Who will care for the growing numbers of tomorrows very old members of societies Will it be state governments The aged themselves Their families The purpose of this book is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future *Aging in World History* David G. Troyansky, 2015-10-05 In *Aging in World History* David G. Troyansky presents the first global history of aging At a time when demographic aging has become a source of worldwide concern and more people are reaching an advanced age than ever before the history of old age helps us understand how we arrived at the treatment of aging in the modern world This concise volume expands that history beyond the West to show

how attitudes toward aging the experiences of the aged and relevant demographic patterns have varied and coalesced over time and across the world From the ancient world to the present this book introduces students and general readers to the history of aging on two levels the experience of individual men and women and the transformation of populations With its attention to cultural traditions medicalization decades of historical scholarship and current gerontology *Aging in World History* is the perfect starting point for an exploration of this increasingly universal aspect of human experience

Unravelling Anti-Aging Jason L. Powell, 2024-04-25 In a society where youthfulness and vitality are highly valued the quest for anti aging solutions has become increasingly popularized in bio medical gerontology However navigating the vast sea of information products and treatments can be overwhelming there is limited academic rigor and theoretic critique from sociological perspectives This book aims to demystify the concept of anti aging and presents critical social approaches for maintaining a healthy life By exploring the science lifestyle factors and power of bio medicine the book will provide readers with a comprehensive monograph to unlock the politics of anti aging drawing from social approaches

Transnational Aging and Reconfigurations of Kin Work Parin Dossa, Cati Coe, 2017-03-10 *Transnational Aging and Reconfigurations of Kin Work* documents the social and material contributions of older persons to their families in settings shaped by migration their everyday lives in domestic and community spaces and in the context of intergenerational relationships and diasporas Much of this work is oriented toward supporting connecting and maintaining kin members and kin relationships the work that enables a family to reproduce and regenerate itself across generations and across the globe

Touched By This Place Valentín, Benjamín, 2024-06-12 Explores the ways in which geographic places influence and are influenced by human life thought and action

The Art of Latina and Latino Elderhood Katynka Z. Martínez, Mérida M. Rúa, 2022-11-20 It is widely recognized that Latinos are a sizable and diverse population and that we are a young demographic The median age of non Hispanic white Americans is 58 whereas for Latinos it is 30 Footnote1 Perhaps this partially explains the dearth of attention afforded to the topic of aging Latinos by academic scholarship and the mainstream media This special issue compellingly alerts us to the reality that there is a growing aging Latino population about which we know very little and that deserves our attention I am grateful to Katynka Martínez and Mérida Rúa for curating *The Art of Latina and Latino Elderhood* since this special issue responds to this significant gap in our knowledge with an exciting set of academic articles and creative contributions that challenges not only our assumptions about Latinos and aging but also our thinking on the types of contributions we include in our journal pages Katynka and Mérida make the case that the story of Latino elderhood is best conveyed through a truly multidisciplinary and interdisciplinary approach bringing together public policy humanistic social sciences and artistic interventions So for the first time *Latino Studies* is pleased to feature a novel in progress a photo essay dial go an artist's monologue and a dialogue among actors alongside more traditional academic articles I think you will agree that this issue before you beautifully conveys why the subject of Latinos and aging should concern all of us and that it will powerfully spur

other researchers and artists to take up the invitation to continue to share new evocative stories about the pleasures difficulties and complexities of Latinx later life Previously published in Latino Studies Volume 19 issue 4 December 2021

Global Aging and Its Challenge to Families Vern L. Bengtson, Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow's very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted 1 Extension of the life course A generation has been added to the average span of life over the past century 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century Vern L Bengtson is an AARP University Chair in Gerontology and Professor of Sociology University of Southern California Ariela Lowenstein is associate professor and head Department of Aging Studies University of Haifa Israel Encyclopedia of Medical Anthropology Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world *Talking Visions* Ella Shohat, 2001 This multivoiced collection of essays and images presents a relational feminism of diverse communities affiliations and practices

The End Game Corey M. Abramson, 2015-06-09 Winner of the Outstanding Publication Award Section on Aging and the

Life Course American Sociological Association Senior citizens from all walks of life face a gauntlet of physical psychological and social hurdles But do the disadvantages some people accumulate over the course of their lives make their final years especially difficult Or does the quality of life among poor and affluent seniors converge at some point The End Game investigates whether persistent socioeconomic racial and gender divisions in America create inequalities that structure the lives of the elderly Avoiding reductionist frameworks and showing the hugely varying lifestyles of Californian seniors The End Game poses a profound question how can provision of services for the elderly cater for individual circumstances and not merely treat the aged as one grey block Abramson eloquently and comprehensively expounds this complex question Michael Warren LSE Review of Books The author s approach situates inequality experienced by older Americans in a real world context and links culture social life biological life and structural disparities in ways that allow readers to understand the intersectionality of diversity imbued in the lives of older Americans Abramson opens a window into the reality of old age the importance of culture and the impact it has on shared prior experiences and the inequalities that structure them A L Lewis Choice

Boomer Bust? Robert B. Hudson, 2008-11-03 Seventy six million Baby Boomers are careening toward retirement in the United States Demographic shifts toward aging populations are taking place around the Western world as a variety of factors biological technological medical and sociocultural are extending life spans Meanwhile birth rates are declining The scaremongers argue that this generational shift is going to be disastrous It will result in skyrocketing tax rates lower retirement and health benefits higher inflation increased unemployment and poverty political instability and a host of other societal ills But will it In Boomer Bust Robert Hudson assembles leading authors from fields such as economics political science and finance to separate fact from fiction highlight the terms of debate and showcase innovative policies that will prevent disaster from occurring From topics like Social Security to older people rejoining the workforce to the elderly as a political lobby this two volume set covers the gamut of economic political financial and business issues related to aging The Boomer generation will leave one of the largest footprints the world has yet seen In retirement as in all else this generation is blazing a path affecting succeeding generations profoundly Boomer Bust charts a path through the thicket of personal and public policy choices facing not just Baby Boomers but all of society

Transformed States Martin Halliwell, 2024-11-15 Transformed States offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book

illustrates how these health issues are reflected in and challenged by literary and cinematic texts from *Oryx and Crake* to *Annihilation* and from *Gattaca* to *Avatar*. By assessing the complex relationship between federal politics and the biomedical industry, *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.

Urban Health and Society Nicholas Freudenberg, Susan Klitzman, Susan Saegert, 2009-07-08 Praise for *Urban Health and Society* This is a spectacular resource for practitioners, policymakers, researchers, and students interested in improving the lives and health of individuals and families in urban settings. This book provides the most current frameworks, research, and approaches for understanding how unique features of the urban physical and social environments shape the health of over half of the world's population that is already residing in large cities. Its interdisciplinary research and practice focus is a welcome innovation. Hortensia Amaro, associate dean, Urban Health Research, Distinguished Professor, Bouve College of Health Sciences and director, Institute on Urban Health Research, Northeastern University. *Urban Health and Society: Interdisciplinary Approaches to Research and Practice* provides students in public health, urban planning, social work, and other professions with the critical knowledge and practical guidance they need to work as effective members of interdisciplinary teams aimed at studying and addressing urban health problems. Throughout the chapters, the book's attention to community participation, social justice, and equity, as well as interdisciplinary research methods, make it an invaluable resource. Barbara A. Israel, professor, Department of Health Behavior and Health Education, School of Public Health, University of Michigan. The book will be of great interest to academics, politicians, planners, and public health professionals attempting to understand or reduce urban health risks, create safe urban environments, and deliver effective and sustainable health services and programs to urban populations. Stephen Lepore, professor and PhD program director, Department of Public Health, Temple University.

Immigration in America Today James Loucky, Jeanne M. Armstrong, Larry J. Estrada, 2006-08-30 America today is witnessing the largest and most sustained wave of immigrants its borders have ever seen. Although factors like the Great Depression, World War II, and quota restrictions had slowed the massive influx of Europeans from the early part of the 20th century, policies like the 1965 Immigration and Nationality Act have relaxed quotas and opened America's doors to hundreds of thousands of immigrants a year from both Eastern and Western hemispheres, to reach a height of over 9 million immigrants in the 1990s. Today, immigrants and policy makers alike grapple with issues regarding employment, education, refugee status, and family reunification, as well as illegal immigrants, many from Mexico.

whose legal immigration alone accounts for more than 20% of immigrants in the US Despite this this comprehensive reference source allows a glimpse of the same motivating factors that drove earlier immigrants through Ellis Island s gates the promise of economic opportunity and the hope of a better life Over 70 A Z entries address topical and timely aspects of modern US immigration including bilingual education domestic work employer sanctions gangs gender homeland security migrant education posttraumatic stress disorder stereotypes Social Structures K. Warner Schaie, Peter Uhlenberg, 2007-03-23 Significant demographic changes are altering the structure of the American population Larger numbers of immigrants are entering the work force will become part of our aging population and increasingly are providing care for the elderly Family structures and communities are evolving as marriage childbearing divorce and cohabitation trends are changing The working population that supports the elderly physically and economically is also changing and will most likely become smaller and less able to support this growing population What does this mean for the well being of our aging population and our efforts to ensure the quality of life for our elderly now and that we will want to enjoy ourselves as we become part of this older population In this volume Drs Schaie and Uhlenberg and a host of leading scholars look at the current structure of the American population in an effort to determine the impact it will have on the lives of the elderly and those growing older with disabilities and chronic illness They examine the effects of the aging baby boomers on health care migration and immigration and how it can support or tax health care networks cultural issues regarding access to health care and changing cultural attitudes towards marriage and family that are affecting the relationships between the elderly and their communities *Manhattan Projects* Samuel Zipp, 2010-05-24 Moving beyond the usual good versus evil story that pits master planner Robert Moses against the plucky neighborhood advocate Jane Jacobs Samuel Zipp sheds new light on the rise and fall of New York s urban renewal in the decades after World War II Focusing on four iconic Manhattan projects the United Nations building Stuyvesant Town Lincoln Center and the great swaths of public housing in East Harlem Zipp unearths a host of forgotten stories and characters that flesh out the conventional history of urban renewal He shows how boosters hoped to make Manhattan the capital of modernity and a symbol of American power but even as the builders executed their plans a chorus of critics revealed the dark side of those Cold War visions attacking urban renewal for perpetuating deindustrialization racial segregation and class division for uprooting thousands and for implanting a new alienating cityscape Cold War era urban renewal was not merely a failed planning ideal Zipp concludes but also a crucial phase in the transformation of New York into both a world city and one mired in urban crisis
