Struggling for a Social Europe Mr Andrew Mathers, 2012-12-28 Protests at summit meetings have inspired intense debate over the nature and significance of the anti globalization or anti capitalist movement However the European dimension of this movement is still largely unknown In this insightful book Andy Mathers addresses this deficit by focusing on events that have marked the birth of a European social movement He relates the development of the movement to key matters such as economic employment and welfare state restructuring along neoliberal lines He also challenges ideas about the nature of contemporary collective action and the character of present day social movements Mathers discusses the significance of the movement and its future development through a critical engagement with the work of major writers in European sociology and of academics influential in the wider global movement such as Pierre Bourdieu A postscript brings readers fully up to date with developments in the type of social Europe propagated by the institutions of the EU as well as in the maturation of a social movement to oppose it **Economic Efficiency** Ben Van Rompuy, 2012-08-01 Over the past

decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the

modernized enforcement regime
