Growth, Income Distribution, and Economic Development Nico Heerink,2012-12-06 In this book a model of long term interrelationships between income distribution population growth and economic development is developed and estimated from data for 54 countries The results indicate that a reduction of income inequality leads to lower fertility and mortality to improved basic needs satisfaction and to lower labour force participation of young and old males and of females in Asia and Africa The effect of income distribution on saving and consumption is found to be negligible These outcomes suggest that family planning and health policies in LDCs will show better results when they are supplemented with policies aimed at making the poor benefit from economic growth As regards development policy the results indicate that a reduction of income inequality does not impair the formation of physical capital but enhances the formation of human capital and lowers the growth rate of the labour force **The Hare Krishna Movement** Edwin Bryant,Maria Ekstrand,2004-06-23 Dancing and

The Production and Distribution of Knowledge in the United States Fritz Machlup,1962 The Production and Distribution of Knowledge in the United States marked the beginning of the study of our postindustrial information society Austrian born economist Fritz Machlup had focused his research on the patent system but he came to realize that patents were simply one part of a much bigger knowledge economy He then expanded the scope of his work to evaluate everything from stationery and typewriters to advertising to presidential addresses anything that involved the activity of telling anyone anything The Production and Distribution of Knowledge in the United States then revealed the new and startling shape of the U S economy Machlup s cool appraisal of the data showed that the knowledge industry accounted for nearly 29 percent of the U S gross national product and that 43 percent of the civilian labor force consisted of knowledge transmitters or full time knowledge receivers Indeed the proportion of the labor force involved in the knowledge economy increased from 11 to 32 percent between 1900 and 1959 a monumental shift Beyond documenting this revolution Machlup founded the wholly new field of information economics The transformation to a knowledge economy has resonated throughout the rest of the century especially with the rise of the Internet As two recent observers noted Information goods from movies and music to software code and stock quotes have supplanted industrial goods as the key drivers of world markets Continued study of this change and its effects is testament to Fritz Machlup s pioneering work Plunkett's Entertainment and Media Industry Almanac Jack W.
