Gannon, 2005-08-04 This provocative and unique work reveals the remarkably influential role of futuristic literature on contemporary political power in America Tracing this phenomenon from its roots in Victorian Britain Gannon convincingly demonstrates that military fiction anticipated and even **Astrofuturism** De Witt Douglas Kilgore, 2010-08-03 Astrofuturism Science Race and Visions of Utopia in Space is the first full scale analysis of an aesthetic scientific and political movement that sought the amelioration of racial difference and social antagonisms through the conquest of space Drawing on the popular science writing and science fiction of an eclectic group of scientists engineers and popular writers De Witt Douglas Kilgore investigates how the American tradition of technological utopianism responded to the political upheavals of the twentieth century Founded in the imperial politics and utopian schemes of the nineteenth century astrofuturism envisions outer space as an endless frontier that offers solutions to the economic and political problems that dominate the modern world Its advocates use the conventions of technological and scientific conquest to consolidate or challenge the racial and gender hierarchies codified in narratives of exploration Because the icon of space carries both the imperatives of an imperial past and the democratic hopes of its erstwhile subjects its study exposes the ideals and contradictions endemic to American culture Kilgore argues that in the decades following the Second World War the subject of race became the most potent signifier of political crisis for the predominantly white and male ranks of astrofuturism In response to criticism inspired by the civil rights movement and the new left astrofuturists imagined space frontiers that could extend the reach of the human species and heal its historical wounds Their work both replicated dominant social presuppositions and supplied the resources necessary for the critical utopian projects that emerged from the antiracist socialist and feminist movements of the twentieth century This survey of diverse bodies of literature conveys the dramatic and creative syntheses that astrofuturism envisions between people and machines social imperatives and political hope physical knowledge and technological power Bringing American studies utopian literature popular conceptions of race and gender and the cultural study of science and technology into dialogue Astrofuturism will provide scholars of American culture fans of science fiction and readers of science writing with fresh perspectives on both canonical and cutting edge astrofuturist visions Farmer in the Sky Robert A. Young Adult Science Fiction C. W. Sullivan III,1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and

gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies

uncovers the Love Generation's roots in occultism and explores the dark side of the Age of Aquarius. His provocative revision of the 1960s counterculture links Flower Power to mystical fascism and follows the magical current that enveloped luminaries like the Beatles, Timothy Leary, and the Rolling Stones, and darker stars like Charles Manson, Anton LaVey, and the Process Church of the Final Judgment. Acclaimed by satanists and fundamentalist Christians alike, this edition includes a revised text incorporating new material on the suicide cult surrounding Carlos Castaneda, the hippy serial killer Charles Sobhraj, the strange case of Ira Einhorn, the Unicorn, the CIA, and ESP, the new millennialism, and more. From H.P. Lovecraft to the Hell's Angels, find out how the Morning of the Magicians became the Night of the Living Dead. The Making of a Man William Mumford Baker, 1883

Science Fiction and Market Realities George Edgar Slusser, Gary Westfahl, Eric S. Rabkin, 1996 Through case studies, other contributors relate science fiction to other forms of underground literature, consider the continual cycle of illegitimate art replacing legitimate art, look at young readers of science fiction, chart the rising and falling stock of science fiction writers' reputations, and consider the influence of editors on a writer's work.

Science Fiction and Futurism Ace G. Pilkington, 2017-03-14 Science and science fiction have become inseparable with common stories, interconnected thought experiments, and shared language. This reference book lays out that relationship and its all-but-magical terms and ideas. Those who think seriously about the future are changing the world, reshaping how we speak and how we think. This book fully covers the terms that collected, clarified, and crystallized the futurists' ideas, sometimes showing them off, sometimes slowing them down, and sometimes propelling them to fame and making them the common currency of our culture. The many entries in this encyclopedic work offer a guided tour of the vast territories occupied by science fiction and futurism. In his Foreword, David Brin says, "Provocative and enticing. Filled with huh moments and leads to great stories." That describes this volume.

Screening Science Errol Vieth, 2001-09-18 Vieth, contemporary communications, Central Queensland University, Australia looks at how science was portrayed in the 1950s in the medium of science fiction films. He argues that the portrayal of science can provide a three-dimensional insight into particular cultural and social contexts. After looking at the contextual elements of history, culture, and the film industry, Vieth continues with a discussion of the nature of science and the scientist, looking at both the nonhuman sciences (i.e., those not related to the human organism) as well as medical and psychological sciences. c. I've Got No Grumbles, 2007-03-01 My Granddad Jonathan Slater of Dartmouth was a very special person. He has always held a very special place in my heart. His letters present quite a history of WWII in Dartmouth. The times were very hard, and Granddad had the additional heartache of losing his wife at the end of 1939. His firstborn son, my father Jonathan, was living in the USA. Jonathan had come over to the USA in 1930 and married Agnes Reinertsen in 1938. His second son, Jocelyn, served in the London Irish Rifles and was taken captive in Tunisia in January 1943. He was held in Italy, Campo PG70 Monteurano, and then sent north to Stalag IVB in Germany. The Russian Army, under General Koniev, liberated the camp, which was located on the Elbe River, in April 1945. This collection of letters tells the story.
