Ecotactics P:

The Fight to Save the Redwoods Susan R. Schrepfer, 2003-04-01 This is not a simple or ordinary history of a conservation crusade Schrepfer very ably traces the changes in scientific wisdom from nineteenth century romanticism and teleological evolutionism to more current ecological dynamism and the influence of those intellectual developments on political history The subject is important much broader than the title suggests and so is the book *American Historical Review* Appetite for Change Warren J. Belasco, 2014-01-21 In this engaging inquiry originally published in 1989 and now fully updated for the twenty first century Warren J Belasco considers the rise of the countercuisine in the 1960s the subsequent success of mainstream businesses in turning granola herbal tea and other revolutionary foodstuffs into profitable products the popularity of vegetarian and vegan diets and the increasing availability of organic foods From reviews of the previous edition Although Red Zinger never became our national drink food and eating changed in America as a result of the social revolution of the 1960s According to Warren Belasco there was political ferment at the dinner table as well as in the streets In this lively and intelligent mixture of narrative history and cultural analysis Belasco argues that middle class America eats differently today than in the 1950 because of the way the counterculture raised the national consciousness about food Joan Jacobs Brumberg *The Nation* This book documents not only how cultural rebels created a new set of foodways brown rice and all but also how American capitalists commercialized these innovations to their own economic advantage Along the way the author discusses the significant relationship between the rise of a countercuisine and feminism environmentalism organic agriculture health consciousness the popularity of ethnic cuisine radical economic theory granola bars and Natural Lite Beer Never has history been such a good read *The Digest* A Review for the Interdisciplinary Study of Food Now comes an examination of the sweeping change in American eating habits ushered in by hippiedom in rebellion against middle class America *Appetite for Change* tells how the food industry co opted the health food craze discussing such hip capitalists as the founder of Celestial Seasonings teas the rise of health food cookbooks how ethnic cuisine came to enjoy new popularity and how watchdog agencies like the FDA served arguably more often as sleeping dogs than as vigilant ones *Publishers Weekly* A challenging and sparkling book In Belasco s analysis the ideology of an alternative cuisine was the most radical thrust of the entire counterculture and the one carrying the most realistic and urgently necessary blueprint for structural social change *Food and Foodways* Here is meat or perhaps miso for those who want an overview of the social and economic forces behind the changes in our food supply This is a thought provoking and pioneering examination of recent events that are still very much part of the present *Tufts University Diet and Nutrition Letter* **Taking Politics Seriously** Michael Williams McCann, 1983 *Soil Conservation* , 1969-08 *Taking Reform Seriously* Michael W. McCann, 1986 Examines the evolution character and impact of liberal public interest activists in American politics and their aspiration to alter both the structure and the policy priorities of the modern corporate state *Ohio Jurisprudence* , 1953 **Nature's Economy** Donald

Worster, 1994-06-24 *Nature's Economy* is a wide ranging investigation of ecology's past first published in 1994 *Books on Conservation and Environment for Youth Libraries*, 1971 **Final Report** Royal Commission on the Use and Effects of Chemical Agents on Australian Personnel in Vietnam, 1985 *Religion in Life* John Baillie, Lucius Hatfield Bugbee, Charles Kendall Gilbert, 1932 Includes section Book reviews **Tax-funded Politics** James T. Bennett, 2017-12-02 The past two decades have seen the growth of well coordinated networks of political activists who have managed to obtain hundreds of millions of taxpayers dollars for political lobbying Although federal regulations prohibit such activities loopholes in the law allow these monies to be masked as private resources State and federal taxpayers monies fund the lobbying efforts of private advocacy groups on both the political left and the right In *Tax Funded Politics* James Bennett argues that governmental agencies rather than combating these abuses aid and abet them in order to increase their own size and scope Drawing on a broad range of examples Bennett shows how the ideals of the nation's Founding Fathers have been subverted by molding and manipulating the will of the people through government orchestrated propaganda Government agencies far from being indifferent to self aggrandizement and the consolidation of wealth and power are concerned with their own self interest whether it is enhancing their budget or supporting a particular political agenda Likewise nonprofit entities claim to operate solely in the public interest but also engage in political advocacy and lobbying activities But when charities do the lobbying blatant self interest is wrapped in the halo of the public interest *Tax Funded Politics* exposes dozens of mutually beneficial arrangements between government and charities involving hundreds of millions of dollars It then explores their implications Groups that receive government funds are loath to criticize failed government programs and are advocates for the expansion of the agencies that provide their support Even charities learn not to bite the hand that feeds them Although the vast majority of the funds are directed to nonprofit groups on the left of the political spectrum so called conservative organizations have also sought and received taxpayers funds despite promise to get g *Western Man and Environmental Ethics* Ian G. Barbour, 1973 Compilation of readings on attitudes toward ecology and technology that have led to the environmental crisis and on ethics issues involved in improving living conditions on earth includes papers on the relationship of the ecological crisis to Western social and cultural anthropology religious practices and beliefs urbanization urban planning capitalism etc and on pollution control the preservation of natural resources etc Diagrams graphs and references *The History of the Sierra Club, 1892-1970* Michael P. Cohen, 1988 Founded by conservationist John Muir in 1892 the Sierra Club grew into the nation's largest and most influential grassroots environmental organization It is devoted to the study and protection of earth's scenic and ecological resources *The Age of Ecology* Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and

the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time
