*Reduction in Viet Nam* Arsenio M. Balisacan,2011-04 Viet Nam s dramatic transition and growth in the 1990s have been attributed to a series of reforms known as doi moi which began in the late 1980s Economic growth of nearly 8% yearly benefited the poor and reduced poverty from 61% in 1993 to 37% in 1998 The proportionate increases in the incomes of the poorest quintile were appreciably larger than those of the top 20 or 40% of the population This result is at variance with typical findings for other countries which indicate that welfare gains from growth are smallest for the lowest quintile and rise with income group The results for Viet Nam suggest that the faster the growth rate the lesser becomes the role of distributive factors that directly influence the poor s well being A print on demand report **Institutional Change in**

**Southeast Asia** Fredrik Sjöholm,Jose L. Tongzon,2005 Institutional Change in Southeast Asiaexamines the institutional changes taking place in and challenges facing the region since 1997 The book focuses on determinants to the adjustments and on implementations of the reforms It also describes various differences in the reform process between countries in the region Southeast Asia s economic development over the last decades has been impressive Most of the region achieved consistently high growth rates accompanied by significant structural transformation and industrialization poverty alleviation and improvements in their overall standard of living as indicated by such social indicators as greater longevity more widespread delivery of basic education and lower infant mortality rates However the crisis that struck Southeast Asia in 1997 had severe economic social and political consequences in the region It also threw into doubt the future economic prosperity

of the countries in Southeast Asia and raised intriguing questions about the quality of their institutions and their approach to economic development Sj holm and Tongzon argue that the economies of Southeast Asia need to reform their institutions if the previous rapid development is to continue The institutional weaknesses have been addressed to different degrees and with different success in the affected countries Against the backdrop of Southeast Asia s importance in the world economy it is hardly possible to overestimate the need to understand this process of change *Labor Market Distortions, Rural-Urban Inequality, and the Opening of the People's Republic of China Economy* Thomas Hertel, 2008-05 Evaluates the impact of some key factor market reforms on rural urban inequality income distribution using a household disaggregated recursive dynamic computable general equilibrium model of the People s Republic of China It also explores how these factor market reforms interact with product market reforms currently under way as part of the country s World Trade Org WTO accession process The simulation results show that reforms in the rural land rental market hukou system as well as increasing off farm labor mobility would reduce the urban rural income ratio dramatically Furthermore the combination of WTO accession factor market reforms improves both efficiency equality significantly Charts tables graphs **How Can Cambodia, Lao PDR, Myanmar, and Viet Nam Cope with Revenue Lost Due to AFTA Tariff Reductions?** Kanokpan Lao-Araya, 2008-12 In joining the Assoc of Southeast Asian Nations ASEAN and ASEAN Free Trade Area Cambodia Lao PDR Myanmar and Viet Nam have agreed to comply with the Common Effective Preferential Tariff CEPT Scheme which reduces intra ASEAN tariff rates on certain imports and may reduce gov t revenue This study proposes tax structure and tax admin reforms and other policies that can be introduced to enhance revenue collection They can Strategically allocate goods among the four CEPT scheme lists Improve their tax systems by replacing traditional general sales taxes with Value Added Tax Reduce inefficiencies that impede tax collection and Discourage tax avoidance and evasion and reduce corruption among tax officials

**Practices of Poverty Measurement and Poverty Profile of Nepal** Devendra Chhetry, 2009-03 Reviews the poverty measuring practices available measures of poverty and economic growth figures of Nepal The poverty rates for FY 1976 77 1984 85 and 1995 96 are found to be not comparable due to change in methodology over time The three poverty rates average 40% Nepal has experienced high economic growth during the 7th 1985 86 to 1989 90 and 8th 1992 93 to 1996 97 Plan periods with no strong evidences of poverty reduction This incompatible result is partially explained by comparing growth of the agricultural sector with the role of the sector in providing employment and income generation at the household level and by comparing social indicators particularly literacy rate with the growth of the nonagricultural sector Tables

**From Bureaucracy to Hyperarchy in Netcentric and Quick Learning Organizations** Lawrence R. Jones, Fred Thompson, 2007-02-01 This book focuses on the inherent contradiction between bureaucracy hierarchy and the vision inspired by the architecture of modern information technology of a more egalitarian culture in public organizations We agree with Evans and Wurster and others who have argued that in the future knowledge based productive relationships will be

designed around fluid teambased collaborative communities either within organizations i e deconstructed value chains or in collaborative alliances such as those with amorphous and permeable corporate boundaries characteristic of companies in the Silicon Valley that is deconstructed supply chains In such relationships everyone can communicate richly with everyone else on the basis of shared standards and like the Internet itself these relationships will eliminate the need to channel information thereby eliminating the trade off between information bandwidth and connectivity The possibility or the threat of random access and information symmetry they conclude will destroy all hierarchies whether of logic or power **ERD Working Paper Series** ,2002 **Monetary Poverty Estimates in Sri Lanka** Neranjana Gunetilleke,2008-05 Provides an introduction to poverty related data available in Sri Lanka monetary measurements of poverty carried out using this data The lack of an official poverty line in Sri Lanka until June 2004 has over time generated a number of poverty lines corresponding poverty measures While these poverty measures have provided a good base for poverty analysis this paper also touches on the problems generated by the use of multiple methods The release of the official poverty line by the Dept of Census Statistics can be seen as a major step forward in the debate on poverty measurement in Sri Lanka Charts tables

*Measuring Competitiveness in the World's Smallest Economies* Ganeshan Wignaraja,2008-05 Attempts to measure competitiveness CP across countries have typically neglected the world s smallest economies Hence a simple composite index the Small State Manufactured Export CP Index or SSMECI was developed to benchmark industrial CP The SSMECI represents the first attempt to provide a comprehensive picture of the CP performance of small states The performance of small states varies across geographical regions income groups country size classes High performing small states had better macroeconomic conditions higher levels of foreign invest more trade openness better levels of educ modern infrastructure A coherent market oriented CP strategy in small states is vital to success on international markets Tables **Why Are Some Countries Richer Than Others?** Jesus Felipe,2008-10 Provides evidence of a problem with the influential testing and assessment of Solow s 1956 growth model proposed by Mankiw et al 1992 and a series of papers evaluating the latter First the assumption of a common rate of technical progress maintained by Mankiw et al 1992 is relaxed Solow s model is extended to include the different levels and rates of technical progress of each country This increases the explanatory power of the cross country variation in income capital of the OECD countries to over 80% The estimates of the parameters are statistically significant and take the expected values and signs Second the estimates merely reflect a statistical artifact This has serious implications for the possibility of actually testing Solow s growth model Illus Citizens in Charge Isabel Licha,2004 Takes a close look at people s involvement in the new framework of state decentralization By focusing on the potential as well as the limitations of citizens managing local budgets the goal is to improve the process of democratization of the state and society The contributors explore the achievements of the process of decentralization which is the backdrop for the emerging process of citizen participation in public decisionmaking at the local government level The volume approaches

this issue from a general perspective and up close through case studies The broad perspective generates a framework for analytical understanding of fiscal decentralization and participation The case studies highlight local experiences in East Asia Indonesia Malaysia and the Philippines and Latin America Bolivia Brazil Colombia and Peru Each case illustrates a particular leadership style and type of participation Important similarities emerge in the areas of trust political will unity among actors intergovernmental coordination capacity of government and citizen organizations to generate participatory public policies and redistribution of power and responsibility between the state and civil society Publisher's web site
