TRAINING THE SWAT TRAINER Tomas C. Mijares, Marcus L. Wall, 2012-04-01 Few areas in American law enforcement are characterized by the frequency quality and magnitude of innovations as the advances found in tactical operations To introduce new equipment and methods during an actual operation without adequate instruction assessment preparation and practice not only invites failure but also subjects an entire organizational chain of command to preventable criticism and avoidable litigation The purpose of this manual is to introduce police instructional personnel to the legal administrative and safety issues associated with this very critical area of police training Its purpose is not to create a cookbook approach to tactical training or even develop a better instructional cadre but rather to present the guidelines to mitigate litigation both at the individual and organizational levels through a proactive approach to the occasional criticism directed toward police tactical training Major topics include the SWAT instructor establishing learning goals and objectives and writing lesson plans engaging the student presenting the material training aids and facilities the need for continuous training and evaluation documentation adhering to standards of the profession and special considerations of training in defense tactics The book s recurring theme is the warning that any technique tactic or new technology taught by an instructor must be applied in a manner that is consistent with existing organizational policy state and federal legislation and relevant case law Substantial legal and operational guidelines are provided that are needed by tactical leaders to develop and improve their leadership skills and tactical success Additionally the appendices contain a wealth of information regarding state law enforcement regulatory agencies national regional and state tactical officer associations sample lesson plans including evaluation drills instructor evaluation questionnaire and curriculum evaluation **ADULT EDUCATORS' RESOURCE MANUAL** Marilyn Laiken, 2024-10-31 This book represents a compilation of all of the author s learning about teaching adults from an almost fifty year career in the field of adult education It explores the art and science of training as a transformative learning process It goes further than the development of understanding and skill to actually help achieve a change in behaviour that reaches beyond the classroom experience The purpose is to help learners critically reflect on their behaviour and underlying assumptions and provide an opportunity for these to be fully explored with others in a dialogic atmosphere This manual outlines in detail the methods needed to create such an educational experience It begins with life before training including

preprogram preparation designing a training program and planning for how to create a positive learning environment It then explores life during training including understanding the adult learner dealing with difficult situations and behaviour facilitating group dynamics in the classroom to create a transformative learning environment managing your own personal leadership and facilitation style and using instructional methods that work To close the book addresses life after training including all forms of evaluation and ensuring enduring impact beyond the training program Finally personal anecdotes from the author s own experience are included throughout the book to enrich and illustrate points being made
