Molecular Farming of Plants and Animals for Human and Veterinary Medicine L. Erickson, W.-J. Yu, J.

Brandle, R. Rymerson, 2013-04-18 Molecular farming has been hailed as the third wave of genetically modified organisms produced through biotechnology for the bio based economy of the future Unlike products of the first wave such as herbicide resistant crop plants which were perceived to benefit only the farmers who used them and the agrochemical companies who developed them products of molecular farming are designed specifically for the benefit of the consumer Such products could be purified from food or non food organisms for a range of applications in industry as well as animal and human health Alternatively the products of this technology could be consumed more directly in some edible format such as milk eggs fruits or vegetables There is a rapidly growing interest On the part of the public as well as in the medical community in the role

food plays in health especially in the immunophysiological impact of food over and above the role of basic nutrition

Selenium in poultry nutrition and health Peter F. Surai, 2023-08-07 Selenium Se is an essential dietary trace element participating in the regulation of various physiological functions in humans farm animals and poultry through its incorporation into a range of selenoproteins Low Se content in main feed ingredients is a common problem worldwide and dietary Se supplementation is a current practise in poultry and farm animal nutrition Recent research clearly proved that sodium selenite used for the last 40 years as a feed supplement is not an optimal form of Se However use of organic selenium in animal poultry diets can help meeting Se requirement and maintain high immunocompetence productive and reproductive performance The goal of this book is to provide up to date information about the roles of Se in poultry nutrition and health A special emphasis is given to the role of selenium as an essential part of the integrated antioxidant system Se in feed and organic Se are characterised in detail with emphasis to selenomethionine as a storage form of Se in the body Also specific Se deficiency related diseases in poultry are described and the importance of Se in growth development immunity and reproduction is demonstrated A link between poultry industry and human health via production of Se eggs and Se enriched meat is shown This book will be of practical importance to poultry producers to nutritionists and vets as well as for avian animal scientists students of agricultural colleges and universities It will also be of interest for researchers in areas related to ecology environmental sciences evolutionary biology etc
