extinction of the royal line an attempt to place a foreigner on Egypt's throne and the accession of three army officers in turn. Among its conclusions are that the mother of Tutankhamun was none other than Nefertiti and that the queen was joint pharaoh in turn with both her husband Akhenaten and her son. As such she was herself instrumental in beginning the return to orthodoxy undoing her erstwhile husband's life work before her own mysterious disappearance.

Its thirteen chapters present new research into the rich corpus of textual sources and archaeological remains and move beyond traditional studies that have treated monastic communities as religious entities in physical seclusion from society. The volume brings together scholars working across traditional boundaries of subject and geography and explores a diverse range of topics from the production of food and wine to networks of scribes patronage and monastic visitation. As such it paints a vivid picture of busy monastic lives dependent on and led in tandem with the non-monastic world.

Helmets and Body Armour in New Kingdom Egypt Alberto Maria Pollastrini, 2024-06-13 This book examines the dynamics around the introduction and spread of helmets and body armour throughout Egypt during the 18th 19th and 20th Dynasties It argues that the word introduction is the best term to define this phenomenon because these types of military equipment were not in fact Egyptian technological innovations but initially appeared at the end of the Bronze Age following the Hurrian expansion in the Middle East before being dispersed throughout the surrounding territories The analysis focuses particularly on a survey of iconographic archaeological and lexicographic attestations from a wide range of surviving material evidence and literary sources On the basis of the collated data it provides as accurate a perspective as possible on how the helmet and the

cuirass were introduced and propagated their impact on warfare and their possible role in ideology across the chronological span of the New Kingdom Pollastrini also draws productive comparisons between the Egyptian data and contemporary attestations from the Middle East and the Aegean region in order to underpin the international dynamics at play In doing so it both encourages a broader ancient historical perspective that sets New Kingdom Egypt within its contemporary context and sheds new light on developments in the military history and warfare of the period
