Electronic Libraries:

Digital Libraries Judith Andrews, 2017-05-15 *Digital Libraries Policy Planning and Practice* brings together a wealth of international experience in the planning and implementation of digital and hybrid library projects providing a stimulating and informative handbook and reference for library staff and information managers. It consists of chapters contributed by leading specialists from Europe, North America, South Africa and the Middle East who offer their insight into the decision making processes that have shaped a variety of different digitization programmes. Beginning with introductory overviews of the digital library context, the US Digital Library Program and the UK e lib and hybrid library programmes, *Digital Libraries* then divides into two main sections on policy and planning and implementation and practice. The first explores concerns such as financial and resource planning, digitized compared to born digital content and related service issues, open access to scholarly research archives, policies for and against preservation and their justification and evaluating electronic information services. The second section is based on case studies on major European and North American digital library projects including the Glasgow Digital Library, UCEEL, University of Central England, Electronic Library, the Networked Digital Library of Theses and Dissertations, discussed in the context of five international projects: the Indiana University music Variations and Variations2 Project and the beginnings of the Library of Congress digital program and its integration into core library services. The concluding chapter discusses the way forward for digital libraries in the context of experiences at Tilburg University library and possible enabling or limiting factors in the future. The result of drawing together these varied and illuminating experiences is a book that offers useful information and comparisons for all digital library project staff, institutional administrators, educators and developers of learning technology. It also provides useful pointers for researchers and project staff involved in archive and museum projects as well as introducing students to the key ingredients of successful digital libraries.

Digital Libraries Lucy A. Tedd, J. A. Large, 2005. Digital libraries are now a reality and yet their implementation and use is still not at an optimum. This text examines the various options for setting up digital libraries from digitising information in the first place to providing the interface to access the information held by the digital global library.
