Electronic Processes in Materials Leonid V. Azároff, James John Brophy, 1977 *Electronic Processes in Non-crystalline Materials* Sir Nevill Francis Mott, Edward Arthur Davis, 1971 **Electronic Processes in Organic Electronics** Hisao Ishii, Kazuhiro Kudo, Takashi Nakayama, Nobuo Ueno, 2015-01-07 The book covers a variety of studies of organic semiconductors from fundamental electronic states to device applications including theoretical studies Furthermore innovative experimental techniques e g ultrahigh sensitivity photoelectron spectroscopy photoelectron yield spectroscopy spin resolved scanning tunneling microscopy STM and a material processing method with optical vortex and polarization vortex lasers are introduced As this book is intended to serve as a textbook for a graduate level course or as reference material for researchers in organic electronics and nanoscience from electronic states fundamental science that is necessary to understand the research is described It does not duplicate the books already written on organic electronics but focuses mainly on electronic properties that arise from the nature of organic semiconductors molecular solids The new experimental methods introduced in this book are applicable to various materials e g metals inorganic and organic materials Thus the book is also useful for experts working in physics chemistry and related engineering and industrial fields **Electronic Processes in Organic Semiconductors** Anna Köhler, Heinz Bässler, 2015-06-08 The first advanced textbook to provide a useful introduction in a brief coherent and comprehensive way with a focus on the fundamentals After having read this book students will be prepared to understand any of the many multi authored books available in this field that discuss a particular aspect in more detail and should also benefit from any of the textbooks in photochemistry or spectroscopy that concentrate on a particular mechanism Based on a successful and well proven lecture course given by one of the authors for many years the book is clearly structured into four sections electronic structure of organic semiconductors charged and excited states in organic semiconductors electronic and optical properties of organic semiconductors and fundamentals of organic semiconductor devices *Electronic Processes in Non-Crystalline Materials* Nevill Francis Mott, Edward A Davis, 2012-02-02 Since the first edition of this highly successful book the field saw many great developments both in experimental and theoretical studies of electrical properties of non crystalline solids It became necessary to rewrite nearly the whole book while the aims of the second edition remained the same to set out the theoretical concepts to test them by comparison with experiment for a wide variety of phenomena and to apply them to non crystalline materials Sir Nevill Mott shared the 1977 Nobel Prize for Physics awarded for his research work in this field The reissue of this book as part of the Oxford Classic Texts in the Physical Sciences is a reprint of the second edition which was published in 1979 *Proceedings of the Fifth International Conference on Electronic Processes in Organic Materials* International Conference on Electronic Processes in Organic Materials, International Conference on Electronic Processes in Organic Materials. 5, 2004, Kyiv, M. Brodyn, 2005 *Ultrafast Infrared Vibrational Spectroscopy* Michael D. Fayer, 2013-03-04 The advent of laser based sources of ultrafast

Hercules, 1962 **Structure-Property Relationships in Surface-Modified Ceramics** C.J. McHargue, R. Kossowsky, Wolfgang O. Hofer, 2012-12-06 The use of ion beams for the modification of the structure and properties of the near surface region of ceramics began in earnest in the early 1980s Since the mechanical properties of such materials are dominated by surface flaws and the surface stress state the use of surface modification techniques would appear to be an obvious application As is often the case in research and development most of the initial studies can be characterized as cataloging the response of various ceramic materials to a range of ion beam treatments The systematic study of material and ion beam parameters is well underway and we are now designing experiments to provide specific information about the processing parameter structure property relationships This NATO Advanced Study Institute was convened in order to assess our current state of knowledge in this field to identify opportunities and needs for further research and to identify the potential of such processes for technological application It became apparent that this class of inorganic compounds loosely termed ceramics presents many challenges to the understanding of ion solid interactions the relationships among ion beam parameters materials parameters and the resulting structures as well as relationships between structure and properties In many instances this understanding will represent a major extension of that learned from the study of metals and semiconductors **Laser-Induced Damage in Optical Materials** Detlev Ristau, 2014-12-03 Dedicated to users and developers of high powered systems Laser Induced Damage in Optical Materials focuses on the research field of laser induced damage and explores the significant and steady growth of applications for high power lasers in the academic industrial and military arenas Written by renowned experts in the field this book concentrates
