Re-examining Pedagogical Content Knowledge in Science Education Amanda Berry,Patricia Friedrichsen,John Loughran,2015-03-24 Pedagogical Content Knowledge PCK has been adapted adopted and taken up in a diversity of ways in science education since the concept was introduced in the mid 1980s Now that it is so well embedded within the language of teaching and learning research and knowledge about the construct needs to be more useable and applicable to the work of science teachers especially so in these times when standards and other measures are being used to define their knowledge skills and abilities Re examining Pedagogical Content Knowledge in Science Education is organized around three themes Re examining PCK Issues ideas and development Research developments and trajectories Emerging themes in PCK research Featuring the most up to date work from leading PCK scholars in science education across the globe this volume maps where PCK has been where it is going and how it now informs and enhances knowledge of science teachers professional knowledge It illustrates how the PCK research agenda has developed and can make a difference to teachers practice and students learning of science **Learning Through School Science Investigation** Azra Moeed,Dayle Anderson,2018-08-24 This book explores teaching and learning through science investigation and practical work It draws upon two representative case studies from New Zealand and examines what students are learning from science investigation in addition it identifies and describes ways in which teachers can make changes that benefit student learning when given time to reflect and respond to research literature and findings The book illustrates how teaching through science investigations in ways that are informed by research can lead to positive learning outcomes for students As such it offers valuable insights for practitioners researchers and educators with an interest in learning through science investigation **Primary Science Education** Anne Forbes,2023-06-15 Primary Science Education A Teacher s Toolkit is an accessible and comprehensive guide to primary school science education and its effective practice in the classroom Primary Science Education is structured in two parts Planning for Science and Primary Science in the Classroom Each chapter covers fundamental topics such as curriculum requirements including the Australian Curriculum and Australian Professional Standards for Teachers preparing effective

learning sequences with embedded authentic assessment combining science learning with other learning areas such as technologies and STEM and critically analysing the teacher's role in the classroom. The text features short answer and Bringing it Together questions to encourage readers to consolidate their understanding of key themes. Case studies throughout provide guidance on the classroom experience and Teacher Background Information boxes explore topics where more in-depth knowledge is required. The book is supported by a suite of online resources including interviews with Australian primary teachers and students and downloadable activities.

Primary Science Curriculum Guide John Stringer, 2013-06-17 This guide provides trainee teachers with an insight into the nature and teaching of primary science. It aims to introduce you to the ways in which children learn science and to the science itself. Each Unit can be studied independently or used to support preparation for school experiences. You will be directed towards additional reading which will develop or confirm the subject knowledge you will need to achieve QTS. The curriculum guide is up to date, revised to take account of Curriculum 2000 and accepted good practice in primary science teaching and learning. It is also flexible; many of the Units are stand-alone. They can be undertaken in any order at your own pace to complement school experiences. The Units are practical and feasible; the activities suggested can be undertaken by the non-specialist in many cases without specialized equipment or access to large numbers of pupils. The guide is comprehensive, covering all the primary science elements in Curriculum 2000 and giving background information into other aspects of primary science teaching. It is also supportive; the guide suggests further texts to support trainees' own understanding of the scientific and pedagogical concepts involved. Additional reading draws on the TTA's list of approved key texts. The original text was piloted by students following a distance learning PGCE course. It has been revised and updated in line with their comments and to meet Curriculum 2000 and Curriculum Guidance for the Foundation Stage. The text was initially developed as a core text for the part-time distance learning course at Liverpool Hope and is designed for trainee teachers on distance learning and flexible routes returning, converting or overseas teachers.

Assessment in Science D.P. Shepardson, 2011-06-27 Assessment in Science combines professional development and classroom practice in a single volume. The pragmatic nature of the book makes it a valuable resource for administrators and staff developers interested in designing professional development programs and for science teachers looking for techniques and examples of classroom-based assessments. Unique features of Assessment in Science include 1 practical strategies and tools for implementing successful professional development programs in science assessment 2 teacher stories and case studies about classroom-based assessment practice and how these teachers changed their assessment practice 3 examples of classroom-based assessments and scoring guides 4 samples of student work with teacher commentary and 5 examples of how the national reform documents in science education served as tools in professional development programs and in designing classroom-based assessments. Assessment in Science expands the existing literature on science assessment by sharing a model for professional development and examples of teacher

developed assessments with accompanying student work and teacher commentary Chapters written by science teachers tell how they assess students and how they have changed their assessment practice as well as how changing assessment practice has resulted in a change in their science instruction Assessment in Science is targeted at practising professionals in science education administrators staff developers science teachers and university science educators Assessment in Science has applicability to graduate level courses in science education and in service courses for science teachers The teacher chapters are also appropriate for use in undergraduate science methods courses to illustrate classroom based assessments
