*Rethinking Universals* Jan Wohlgemuth,Michael Cysouw,2010-03-26 Universals of language have been studied extensively for the last four decades

allowing fundamental insight into the principles and general properties of human language Only incidentally have researchers looked at the other end of the scale And even when they did they mostly just noted peculiar facts as quirks or unusual behavior without making too much of an effort at explaining them beyond calling them exceptions to various rules or generalizations Rarissima and rara features and properties found only in one or very few languages tell us as much about the capacities and limits of human language s as do universals Explaining the existence of such rare phenomena on the one hand and the fact of their rareness or uniqueness on the other is a reasonable and interesting challenge to any theory of how human language works The present volume for the first time compiles selected papers on the study of rare linguistic features from various fields of linguistics and from a wide range of languages

**The Emergence of Distinctive Features** Jeff Mielke, 2008-03-13 The Emergence of Distinctive Features will be of essential interest to phonologists and typologists as well as to syntacticians cognitive scientists and scholars outside linguistics interested in the nature of language and its acquisition

**The Languages and Linguistics of Africa** Tom Güldemann, 2018-09-10 This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa the continent with the largest number of languages in the world It covers the major domains of linguistics offering both a representative picture of Africa s linguistic landscape as well as new and at times unconventional perspectives The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics

**New Directions in Grammaticalization Research** Andrew D.M. Smith, Graeme Trousdale, Richard Wälchli, 2015-04-08 The articles in this volume examine a number of critical issues in grammaticalization studies including the relationship between grammaticalization and pragmaticalization subjectification and intersubjectification and grammaticalization and language contact The contributions consider data from a broad range of spoken and signed languages including Greek Japanese Nigerian Pidgin Swedish and Turkish Sign Language The authors work in a variety of theoretical frameworks and draw on a number of research traditions The volume will be of primary interest to historical linguists though the diversity of approaches and sources of data mean that the volume is also likely have considerable general appeal

**Theoretical Approaches to African Linguistics** Akinbiyi Akinlabi, 1995 The first of a new series devoted to the study of African linguistics this study presents papers on a wide range of disciplines pertinent to the field that will be of interest to students and researchers This first volume includes work on Niger Congo languages such as Yoruba and Igbo and several Bantu languages

**Participles** Ksenia Shagal, 2019-11-05 The book is the first large scale

typological study of participles based on data from more than 100 languages Its main aim is to model the diversity of non finite verb forms involved in adnominal modification Participles are examined with respect to several morphological and syntactic parameters and are shown to be a versatile cross linguistic category The book is of interest to language typologists and descriptive linguists      *Politics and Identity Formation in Southeastern Nigeria* Apollos O. Nwauwa,Ogechi E. Anyanwu,2019-05-20 Scholarly studies on the Igbo have been scant and fragmented *Politics and Identity Formation in Southeastern Nigeria* The Igbo in Perspective fills an obvious gap exploring the social cultural economic political and aesthetic traditions that distinguish the Igbo of southeastern Nigeria from their neighbors In scope content and analysis this book is both multi and cross disciplinary focusing on the experiences and forces that have shaped the Igbo society identity formation and sociocultural political and aesthetic representations Themes such as the importance of Igbo names in understanding the people s social linguistic religious gender and cultural identities as well as the intersection of language politics socialization education and aesthetic expression in the Igbo experience in Nigeria are interrogated in a refreshing fashion with an appreciable level of originality      The Present Perfective Paradox Across Languages Astrid De Wit,2017 This book presents an analysis of how speakers of typologically diverse languages report present time situations Astrid De Wit brings together cross linguistic observations from English French the English based creole language Sranan and various Slavic languages and relates them to the same phenomenon the present perfective paradox      Complex Processes in New Languages Enoch O. Aboh,Norval Smith,2009-12-17 In recent years there has been a new interest in evaluating complex structures in languages The implications of such studies are varied e g the distinction between supposedly more complex and less complex languages how complexity relates to human knowledge of language and the role of the reduction or increase of complexity in language change and creolization This book focuses on the latter issue but the conclusions presented here hold of typological complexity in general The chapters in this book show that the notion of complexity as conceived of in linguistics mainly centres on the outer manifestations of language e g numbers of affixes This exercise is useful in establishing the patterning of languages in terms of their degrees of analyticity or synthesis but it fails to address the properties of the inner rules of these grammars and how these relate to the computational system that governs the human language capacity Put simply issues of complexity should not be equated with the complexity observed in surface patterns of grammars alone
