

The book cover features a dark brown chalkboard background. At the top, there is a horizontal strip with faint, handwritten mathematical formulas in white chalk, including $M(1, \dots, 1) + 1/e$ and N . The title "ELEMENTS OF PROBABILITY AND STATISTICS" is printed in large, white, serif capital letters in the center. Below the title, a thin white horizontal line separates it from the author's name, "Frank L. Wolf", which is printed in a smaller, white, serif font. The bottom half of the cover shows a close-up of the book's binding, which is made of a textured, reddish-brown material, possibly leather or cloth, with visible stitching and a metal clasp mechanism.

Cramer, 1955 Elements of Probability and Statistics Francesca Biagini, Massimo Campanino, 2016-01-22 This book provides an introduction to elementary probability and to Bayesian statistics using de Finetti's subjectivist approach One of the features of this approach is that it does not require the introduction of sample space a non intrinsic concept that makes the treatment of elementary probability unnecessarily complicate but introduces as fundamental the concept of random numbers directly related to their interpretation in applications Events become a particular case of random numbers and probability a particular case of expectation when it is applied to events The subjective evaluation of expectation and of conditional expectation is based on an economic choice of an acceptable bet or penalty The properties of expectation and conditional expectation are derived by applying a coherence criterion that the evaluation has to follow The book is suitable for all introductory courses in probability and statistics for students in Mathematics Informatics Engineering and Physics Elements of Statistics Donald R.
