Gritty Cities:

Naked City Sharon Zukin, 2009-12-18 Sharon Zukin argues that the rapid and pervasive demand for authenticity and the consequent escalating real estate prices has helped drive out the very people who first lent a neighborhood its authentic aura immigrants the working class and artists Zukin traces this economic and social evolution in six archetypal New York areas Williamsburg Harlem the East Village Union Square Red Hook and the city's community gardens and shows that for followers of Jane Jacobs this transformation is a perversion of what was supposed to happen

Streets and the Shaping of Towns and Cities Michael Southworth, Eran Ben-Joseph, 2013-04-22 The topic of streets and street design is of compelling interest today as public officials developers and community activists seek to reshape urban patterns to achieve more sustainable forms of growth and development Streets and the Shaping of Towns and Cities traces ideas about street design and layout back to the early industrial era in London suburbs and then on through their institutionalization in housing and transportation planning in the United States It critiques the situation we are in and suggests some ways out that are less rigidly controlled more flexible and responsive to local conditions Originally published in 1997 this edition includes a new introduction that addresses topics of current interest including revised standards from the Institute of Transportation Engineers changes in city plans and development standards following New Urbanist Smart Growth and sustainability principles traffic calming and ecologically oriented street design

Reconsidering Trenton Steven M. Richman, 2014-01-10 Trenton like the state of New Jersey is often maligned these days but there was a time when Trenton was the fiftieth largest city in the United States and boasted worldwide leaders in the iron and steel rubber and pottery industries Like many cities of its comparative size and prowess that came of age in the Industrial Revolution Trenton diminished in the aftermath of World War II and has become for many one of the lost cities a place of lessened population abandoned houses and shuttered factories Featuring a series of meditative explorations on the essence of the American post industrial city through the prism of Trenton this book explores the city's history architecture parks factories and neighborhoods through text and image highlighting the importance of such post industrial cities

Subcommittee on the Department of the Interior and Related Agencies, 1984 Arts Money Joan Jeffri, **Harrisburg Industrializes** Gerald G. Eggert, 2010-11-01 In 1850 Harrisburg Pennsylvania was a community like many others in the U S employing most of its citizens in trade and commerce Unlike its larger neighbors Pittsburgh and Philadelphia Harrisburg had not yet experienced firsthand the Industrial Revolution Within a decade however Harrisburg boasted a cotton textile mill two blast furnaces and several iron rolling mills a railroad car manufactory and a machinery plant This burst of industrial activity naturally left its mark on the community by within two generations most industry had left Harrisburg and its economic base was shifting toward white collar governmental administration and services Harrisburg Industrializes looks at this critical episode in Harrisburg s history to discover how the coming of the factory system affected the life of the community Eggert begins with the earliest years of Harrisburg describing its transformation from a frontier town to a small commercial and artisanal community He identifies the early entrepreneurs who built the banking commercial and transportation infrastructure which would provide the basis for industry at mid century Eggert then reconstructs the development of the principal manufacturing firms from their foundings through the expansive post Civil War era to the onset of deindustrialization near the end of the century Through census and company records he is able to follow the next generation of craftsmen and entrepreneurs as well as the new industrial workers many of then minorities who came to the city after 1850 Eggert sees Harrisburg s experience with the factory system as second stage or imitative industrialization which was typical of many if not most communities that developed factory production At those relatively few industrial centers Lowell and Pittsburgh for example where new technologies arose and were aggressively impose on workers the consequences were devastating often causing alienation rebellion and repression By contrast at secondary centers like Harrisburg or Reading Scranton or Wilmington industrialization came later was derivative rather than creative was modest in scale and focused on local and regional markets Because the new factories did not compete with local crafts few displaced artisans became factory hands At the same time an adequate supply of local native born workers forestalled an influx of immigrants so Harrisburg experienced little ethnic hostility Ultimately therefore Eggert concludes that the introduction of an industrial order was much less disruptive in Harrisburg than in the major industrial sites primarily because it did not alter so profoundly the existing economic and social order Good with Their Hands Carlo Rotella, 2002-10-25 This eloquent streetwise book is a paean to America s Rust Belt and a compelling exploration of four milieus caught up in a great transformation of city life With loving attention to detail and a fine sense of historical context Carlo Rotella explores women s boxing in Erie Pennsylvania Buddy Guy and the blues scene in Chicago police work and crime stories in New York City especially as they converged in the making of the movie *The French Connection* and attempts at urban renewal in the classic mill city of Brockton Massachusetts Navigating through accrued layers of cultural economic and

personal history Rotella shows how stories of city life can be found in a boxing match a guitar solo a chase scene in a movie or a landscape The stories he tells dramatize the coming of the postindustrial era in places once defined by their factories a sweeping set of changes that has remade the form and meaning of American urbanism A native of the Rust Belt whose own life resonates with these stories Rotella has gone to the home turfs of his characters hanging out in boxing gyms and blues clubs riding along with cops and moviemakers discussing the future of Brockton with a visionary artist and a pitbull fancying janitor who both plan to save the city's soul These people make culture with their hands and hands become an expressive metaphor for Rotella as he traces the links between their individual talents and the urban scenes in which they flourish His writing elegantly connects what happens on the street to the larger story of urban transformation especially the shift from a way of life that demanded individuals be good with their hands to one that depends on the intellectual and social skills fostered by formal education and service work Strong feelings emerge in this book about what has been lost and gained in the long slow aging out of the industrial city But Rotella's journey through the streets has its ultimate reward in discovering deep rooted instances of what he calls truth and beauty in the Rust Belt

Urban Nation Robert Freestone, 2010-04-01 Urban Nation Australia's Planning

Heritage provides the first national survey of the historical impact of urban planning and design on the Australian landscape. This ambitious account looks at every state and territory from the earliest days of European settlement to the present day. It identifies and documents hundreds of places: parks, public spaces, redeveloped precincts, neighbourhoods, suburbs, up to whole towns that contribute to the distinctive character of urban and suburban Australia. It sets these significant planned landscapes within the broader context of both international design trends and Australian efforts at nation and city building.

New Jersey's Urban Strategy Richard Lehne, James Robinson, 1980 *Revitalising Historic Urban Quarters* Tim Heath, Taner Oc, Steve Tiesdell, 2013-09-13. This book synthesizes urban design and urban regeneration by examining the revitalization of a number of historic urban quarters. Its focus is on quarters or areas where there is a significant number of historic buildings concentrated in a small area with places and area based approaches. Many cities have such quarters that confer on them a sense of place and identity through their historic continuity and cultural associations. The quarters are often an integral element of the city's image and identity. The lessons and observations from the experience of the revitalization of such historic urban quarters forms the core of this book with a number of case study examples from North America and Europe showing a variety of approaches to and outcomes of revitalization. **Authentic and Inauthentic Places in**

Tourism Jane Lovell, Chris Bull, 2017-09-05. With the rise of post truth and fake news, a thorough examination of authenticity has never been so relevant. This book explores the geography of authenticity investigating a wide variety of places used by tourists. Not only does it assess what might be described as the more traditional objects for examination: places such as the city, the countryside and the coast, it also includes chapters on art and place, hipster places, gentrification, heritage sites, film locations, photographed places and eventful places. Using a wide angled lens on places reveals linkages and possibilities enabling the book to skate across the surface of the geography of authenticity, locating the magically real, heritage site, the poignant replica, the authenticated theme park, the unmasked carnival. In focusing on authentic and inauthentic places, this text provides a useful contribution to the understanding of how places are changing, how they are perceived and how authenticity is embodied and performed within them. *Authentic and Inauthentic Places in Tourism* is an insightful study and an essential read for those involved in the study of geography, tourism, urban studies, culture and heritage. **Urban**

America Examined Dale Casper, 2017-10-30. Originally published in 1985, *Urban America Examined* is a comprehensive bibliography examining the urban environment of the United States. The book is split into sections corresponding to the four main geographic regions of the country, looking respectively at research conducted in the East, South, Midwest and West. The book provides a broad cross section of sources from books to periodicals and covers a range of interdisciplinary issues such as social theory, urbanization, the growth of the city, ethnicity, socialism and US politics. *Searching for Paradise* Douglas E. Booth, 2002. The signs of economic change loom large in the mountain West as shuttered mines and lumber mills are overshadowed by luxurious homes sprouting on valley bottoms and ridge lines. This perceptive book explains these changes.

assesses their effects on the natural environment and gauges the reactions of local communities Drawing on concepts from economics environmental ethics and conservation biology Booth suggests that the ultimate solution lies in re directing population growth away from rural areas to reinvigorated and environmentally attractive ecological cities and to increase the density of development within rural areas themselves Policymakers activists and local citizens concerned with rural sprawl will find this book an invaluable resource Visit our website for sample chapters *Imagined Frontiers* Carl Abbott,2015-09-10 We live near the edge whether in a settlement at the core of the Rockies a gated community tucked into the wilds of the Santa Monica Mountains a silicon culture emerging in the suburbs or in the future homesteading on a terraformed Mars In *Imagined Frontiers* urban historian and popular culture scholar Carl Abbott looks at the work of American artists who have used novels film television maps and occasionally even performance art to explore these frontiers the metropolitan frontier of suburban development the classic continental frontier of American settlement and the yet unrealized frontiers beyond Earth Focusing on writers and artists working during the past half century an era of global economic and social reach Abbott describes the dialogue between historians and social scientists seeking to understand these frontier places and the artists reimagining them in written and visual fictions This book offers perspectives on such well known authors as T C Boyle and John Updike and on such familiar movies and television shows as *Falling Down* and *The Sopranos* By putting *The Rockford Files* and the cult favorite *Firefly* in conversation with popular fiction writers Robert Heinlein and Stephen King and literary novelists Peter Matthiessen and Leslie Marmon Silko Abbott interweaves the disparate subjects of western history urban planning and science fiction in a single volume Abbott combines all new essays with others previously published but substantially revised to integrate western and urban history literary analysis and American studies scholarship in a uniquely compelling analysis of the frontier in popular culture
