Policymaking Under Adversity
Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's Public Policymaking Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners

The Rush to Policy Peter William House, Roger Roger Don Shull, Rush to Policy explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and

failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including The Art of Public Policy Analysis and with Roger D Shull Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation

A World In Transition: Humankind and Nature Diederik Aerts, Jan Broekaert, Willy Weyns, 2012-12-06 A World in Transition Humankind and Nature is appropriately entitled after its aim for an intrinsic property of reality change Of major concern in this era of transformation is the extensive and profound interaction of humankind with nature The global scale social and technological project of humankind definitely involves a myriad of changes of the ecosphere This book develops from the call for an interdisciplinary synthesis and respect of plurality acknowledging the evolving scientific truth to the need for an integrated but inevitably provisional worldview Contributors from different parts of the world focus on four modes of change i Social change and the individual condition ii Complex evolution and fundamental emergent transformations iii Ecological transformation and responsibility inquiries iv The economic ecological and socio technical equilibria Primarily concerned with the deep transformations of humankind and of the relationship between humans and nature it is addressed to a broad and thinking public that wants to be kept informed

The Bet Paul Sabin, 2013-09-03 The Bet uses a legendary wager between the Stanford biologist Paul Ehrlich and the conservative University of Illinois economist Julian Simon to examine the roots of modern environmentalism and its relationship to broader political conflicts in the nation Ehrlich author of the landmark 1968 book The Population Bomb believed that rising populations would cause overconsumption scarcity and disastrous famines Simon countered that flexible markets technological change and human ingenuity would allow societies to adapt to changing circumstances and continue to improve human welfare In 1980 they made a much ballyhooed bet about the future prices of five metals that served as a proxy for their arguments about the future The Bet weaves intellectual biographies of Ehrlich and Simon into the history of late twentieth century environmental politics and other struggles of the era between liberals and conservatives Humanity's larger gamble on the future still remains unresolved By wrestling with the different sides of these arguments The Bet encourages a more nuanced approach to environmental problems one that acknowledges the limitations of both ecology and economics in guiding policy and that instead emphasizes the conflicting values that underlie political choices The Bet is structured around three bets first the 1000 bet that Ehrlich and two colleagues made with Simon over the prices of chromium copper nickel tin and tungsten second the bet that the United States faced in the 1980 presidential election in choosing between Carter and Reagan and third the larger gamble that we as a society continue to make as we make choices
