Advancing Relational Leadership Research Mary Uhl-Bien, Sonia M. Ospina, 2012-10-01 Leaders and followers live in a relational world a world in which leadership occurs in complex webs of relationships and dynamically changing contexts Despite this our theories of leadership are grounded in assumptions of individuality and linear causality If we are to advance understandings of leadership that have more relevance to the world of practice we need to embed issues of relationality into

leadership studies This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice Included are cutting edge thinking heated debate and passionate perspectives on the issues at hand The chapters reveal the varied and nuanced treatments of relationality that come from authors alternative paradigmatic entity constructionist critical views Dialogue scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape Using paradigm interplay they unpack assumptions and lay out a roadmap for relational leadership research A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives The book is aimed at those who feel that much of current leadership thinking is missing the boat in today's complex relational world It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership both those with much research exposure and those new to the field

Leadership Theory and Research Martin M. Chemers, Roya Ayman, 1993 This volume was conceived as a tribute to Fred Fiedler in

honor of his fortieth year of research and scholarship in the study of leadership and organizational effectiveness Fiedler's contributions to this field have been of such magnitude that the term paradigm shift does not seem out of place in describing them As Harry Triandis points out in his chapter in this book the study of leadership can be fairly divided into before and after Fiedler's introduction of contingency theories The realization that leadership effectiveness depends on the interaction of qualities of the leader with demands on the situation in which the leader functions made the simplistic one best way approaches of earlier eras obsolete The implication of contingency notions spread like sonic waves throughout the field of organizational studies Publisher description *Researching Leadership-As-Practice* Vasilisa Takoeva, 2021-04-19 One current challenge of conducting research from the leadership as practice perspective is a practical one how to capture and analyse the elusive practice of leadership within the web of mundane organising processes Although a number of researchers have attempted to address the issue there is not yet a definitive how to guide to making sense of the empirical manifestations of leadership practices The book responds directly to this challenge and offers a theoretical framework and practical guidance to capturing identifying and analysing evidence of leadership practice emergence and provides implications of this approach for leadership academics and practitioners The developed framework enables a method for understanding these leadership instances as they are enacted by individuals within and against the evolving activities of their day to day work The framework is underpinned by cultural historical activity theory and critical realism and it conceptualises leadership practice by placing agents actions and interactions within the context of their relationships objectives experiences material and non material artefacts and wider organising processes and organisational structures work that has not yet been undertaken in the field It offers a strong theoretical foundation for further development of our understanding of leadership as practice providing a methodological guidance for undertaking leadership as practice research and enables a discussion on the variety of underlying processes and elements as they emerge from empirical observations It will be of value to researchers academics professionals and students in the fields of business and management with a particular interest in management theory organisational studies and leadership research **Leadership Theory** John P. Dugan, Natasha T. Turman, Amy C. Barnes, 2017-01-27 The facilitator's guide brings to life the content of the survey text Leadership Theory It offers instructive advice on how to prepare for the use of a critical perspective as well as providing practical resources to translate survey text content to practice The facilitator's guide consists of An overview of how to use the guide as well as recommended skills and reflection questions for educators prior to implementing material Objectives critical concepts a chapter overview and a chapter framework for each chapter from Leadership Theory Lesson plan walk throughs containing 2-3 activities for each chapter of the survey text with information for learning outcomes activity setup and additional notes for facilitation *New perspectives on leadership research* Jürgen Weibler, 2004 **A Grounded Theory Study of Effective Global Leadership Development Strategies: Perspectives from Brazil, India, and Nigeria** Karen Jane Lokkesmoe, 2009
