Group Discussion And Decision Making:

Group Discussion and Decision Making John Hasling, 1975 *The Oxford Handbook of Group and Organizational Learning* Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not In groups learning can occur at the level of the individual member and or the group as a whole In organizations learning can occur at both of these levels as well as that of the wider collective Besides varying in the amount and kind of information they acquire groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units In general groups and organizations that are proficient in acquiring retaining and transferring knowledge are more productive and more enduring than their less able counterparts The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines Because many of the same processes influence learning in groups and organizations including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity

Small Group and Team Communication Thomas E. Harris, John C. Sherblom, 2018-05-10 Much of contemporary communication occurs between and among small groups whether in person in a work setting or on the Internet via email Facebook or instant messages How we engage in our small group communication in each medium matters To be effective we have to consider our group roles norms cohesion process and phases of development as well as our personal verbal and nonverbal communication and listening styles To succeed as a member of a team we need to consider the limits of our personal experience and perspective recognize the

creative strength of diverse perspectives in decision making and problem solving develop our conflict management skills and strengthen our leadership skills To be successful necessitates an understanding of group process participation style ethical group behavior and the influences of the medium Small Group and Team Communication explores all these different interconnections and the communication strategies we use in our work and social groups The authors use the systems perspective as their core approach throughout the text treating small groups as complex open systems reliant upon communication to achieve success Many chapters highlight the importance of considering ethics and diversity in relation to a variety of topics Harris and Sherblom address the growing influence of computer mediated communication to this discipline Real world applied examples show students that what they re learning aren t simply abstract concepts but knowledge that will serve them outside the classroom

Judgment and Decision Making at Work Scott Highhouse, Reeshad S.

Dalal, Eduardo Salas, 2013-09-05 Employees are constantly making decisions and judgments that have the potential to affect themselves their families their work organizations and on some occasion even the broader societies in which they live A few examples include deciding which job applicant to hire setting a production goal judging one s level of job satisfaction deciding to steal from the cash register agreeing to help organize the company s holiday party forecasting corporate tax rates two years later deciding to report a coworker for sexual harassment and predicting the level of risk inherent in a new business venture In other words a great many topics of interest to organizational researchers ultimately reduce to decisions made by employees Yet numerous entreaties notwithstanding industrial and organizational psychologists typically have not incorporated a judgment and decision making perspective in their research The current book begins to remedy the situation by facilitating cross pollination between the disciplines of organizational psychology and decision making The book describes both laboratory and more naturalistic field research on judgment and decision making and applies it to core topics of interest to industrial and organizational psychologists performance appraisal employee selection individual differences goals leadership teams and stress among others The book also suggests ways in which industrial and organizational psychology research can benefit the discipline of judgment and decision making The authors of the chapters in this book conduct research at the intersection of organizational psychology and decision making and consequently are uniquely positioned to bridging the divide between the two disciplines
