

relation to our development of understanding is his faulty understanding of the relationship between Church, Scripture, and tradition. Just as he dismisses the substantialist metaphysics, so too he apparently dismisses the Christian community and its self-understanding from the days of Origen even until now. In the light of his professed commitment to Whitehead's process philosophy and to existentialism, it is difficult to understand how so much of the past can be neglected. Whatever else O.'s philosophical guides should have done, they should have at least convinced him that there can be no centuries-long gap between the Christ event then in Palestine and the Christian understanding now. Scripture was the result of the apostolic Church's self-understanding; it was also, because of the mutuality of experience and expression, a cause. But this original and still controlling situation did not die with the last apostle, only to spring full-blown from the head of the twentieth century; rather there has been a constant development in the Christian community's understanding of the central Christian fact mediated by Scripture. It is precisely because this development has continued that the present transformation of the Church's self-understanding into a more existential mode is possible.

In spite of these major defects, O.'s book should still perform a necessary service. Relatively little has been written to date by American theologians on the problems and possibilities offered theology by contemporary philosophies such as those of Whitehead and Heidegger. O.'s work offers some reason for hoping that further studies in this area will be extremely valuable. His work also suggests the need for greater understanding of contemporary theories of language, particularly as these theories would apply to theological language, as well as a continued growth in our understanding of the Church not merely as the present community of believers but as that total community spread through history.

GROUP DYNAMICS IN THE RELIGIOUS LIFE. By W. W. Meissner, S.J. Notre Dame, Ind.: Univ. of Notre Dame Press, 1965. Pp. xii + 188. \$4.95.

Books have a way of falling short of the aims and grand purposes stated in their introductions. Not so for this book by Fr. Meissner. The author took a long look at the current status of writings concerning religious life here in America, perceptively pinpointed an area of insufficient evidence, and then set himself the task of filling the void—to a noteworthy extent. He saw that “attempts to analyze the religious life from a scientific standpoint remain relatively few and far between.” He undertook to make such an analysis, limiting his effort to the synthesizing of current experimental conclusions
