Growing A Family Where People Really Like Each Other:

Growing Each Other Up Sara Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle are embedded in their evolving relationships and shaped by the rapidly transforming world around them With *Growing Each Other Up* Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance *Growing Each Other Up* is rich in the voices of actual parents telling their own stories of raising children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light You can really grow John Hindley, 2015-02-27 The Christian life can be about thriving not merely surviving Discover what Christian growth actually is and how to enjoy it God does not want us simply to survive in our faith He wants us to thrive to enjoy growing as part of his family Many of us want to grow but don't know how to Many of us feel stuck in a rut in our faith or are following routines that don't seem to work John shows us what growth actually is why growth is hugely exciting and how to grow into the people we long to be *You can really grow* and this book shows you how

In and Out of Each Other's Bodies Maurice Bloch, 2015-11-17 What is human sociality How are universals such as truth and doubt variously demonstrated and negotiated in different cultures This book offers an accessible introduction to these and other fundamental human questions Bloch shows that the social consists of two very different things One is a matter of continual adjustments between individuals who read each others minds and thus as in sex and birth go in and out of each other's minds and bodies The other is a time defying system of roles and groups Interaction at this level is created by ritual

and is unique to humans What is referred to by the word religion is a part of this but it is not separate The study of religion as such is therefore theoretically misleading A second major theme is the way truth is established in different cultures Bloch's arguments go against recent approaches in anthropology which have sought to relativize ideas of the social and religion
