Growing Global Migration And Its Implications For The Us:

Growing Global Migration and Its Implications for the United States, 2001 **Growing Global Migration and Its Implications for the United States**, 2001 Examines the growing global movement of people and its implications for the United States Study examines the political economic social and security issues raised by increased migration including the extent to which some countries may try to use migration as leverage in bilateral relations **Environmental Change and Security Project Report**, 2002 *Truth to Power* Robert L. Hutchings, Gregory F. Treverton, 2019 Truth to Power the first ever history of the U S National Intelligence Council NIC is told through the reflections of its eight Chairs in the period from the end of the Cold War until 2017 Co editors Robert Hutchings and Gregory Treverton add a substantial introduction placing the NIC in its historical context going all the way back to the Board of National Estimates in the 1940s as well as a concluding chapter that highlights key themes and judgments This historic mission of this remarkable but little known organization now forty years old is strategic intelligence assessment in service of senior American foreign policymakers Its signature inside products National Intelligence Estimates are now accompanied by the NIC s every four years Global Trends Unclassified Global Trends has become a noted NIC brand its release awaited by officials academics and private sector managers around the world Truth to Power tracks the NIC s role in providing strategic analysis on every major foreign policy issue confronting the United States during this consequential period Chapters provide insider insights on the Balkan wars of the 1990s the terrorist attacks of September 11 2001 the invasion and occupation of Iraq in 2003 the nuclear weapons programs in Iran and North Korea upheaval in the Middle East including the rise and fall of the Islamic State the rise of China and the Russia s turn toward aggression under Vladimir Putin The book also assesses the NIC s newly expanded role in direct support to meetings of the National Security Council as well as its longstanding role in producing longer range strategic intelligence **Dangerous Sanctuaries** Sarah Kenyon Lischer, 2015-07-22 Since the early 1990s refugee crises in the Balkans Central Africa the Middle East and West Africa have led to the international spread of civil war In Central Africa alone more than three million people have died in wars fueled at least in part by internationally supported refugee populations The recurring pattern of violent refugee crises prompts the following questions Under what conditions do refugee crises lead to the spread of civil war across borders How can refugee relief organizations respond when militants use humanitarian assistance as a tool of war What government actions can prevent or reduce conflict To understand the role of refugees in the spread of conflict Sarah Kenyon Lischer systematically compares violent and nonviolent crises involving Afghan Bosnian and Rwandan refugees Lischer argues against the conventional socioeconomic explanations for refugee related violence abysmal living conditions proximity to the homeland and the presence of large numbers of bored young men Lischer instead focuses on the often ignored political context of the refugee crisis She suggests that three factors are crucial the level of the refugees political cohesion before exile the ability and willingness of the host state to prevent military activity

and the contribution by aid agencies and outside parties of resources that exacerbate conflict Lischer's political explanation leads to policy prescriptions that are sure to be controversial using private security forces in refugee camps or closing certain camps altogether With no end in sight to the brutal wars that create refugee crises Dangerous Sanctuaries is vital reading for anyone concerned with how refugee flows affect the dynamics of conflicts around the world **Protecting the**

International Handbook of Urban Policy: Contentious global issues H. S. Geyer, 2007-01-01 This first Handbook in a series of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives Matters related to urban densification population mobility urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice Urban policy covers a vast field This first volume combines chapters covering three broad themes policy issues pertaining to the spatial aspects of the city social and mobility issues and issues of urban governance The spotlight initially falls on urban structure urban densification the

disappearing urban rural divide the urban economic landscape and the transformation of socialist economies The Handbook then goes on to focus on migration social mobility crime terrorism and social inequality Finally urban sustainability and urban governance come under the spotlight Integration of the planning process flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook Books of this nature are often slanted in one particular direction however this Handbook's approach is different Not only has the editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues hence the volume's subtitle of contentious global issues As a Handbook the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers of geography and urban and development planning demography and social science and environmental scientists for the focus on urban sustainability issues

Weapons of Mass Migration Kelly M. Greenhill, 2011-06-23 At first glance the U S decision to escalate the war in Vietnam in the mid 1960s China's position on North Korea's nuclear program in the late 1990s and early 2000s and the EU resolution to lift what remained of the arms embargo against Libya in the mid 2000s would appear to share little in common Yet each of these seemingly unconnected and far reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion one predicated on the intentional creation manipulation and exploitation of real or threatened mass population movements In *Weapons of Mass Migration* Kelly M Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence She shows both how often this unorthodox brand of

coercion has been attempted more than fifty times in the last half century and how successful it has been well over half the time She also tackles the questions of who employs this policy tool to what ends and how and why it ever works Coercers aim to affect target states behavior by exploiting the existence of competing political interests and groups Greenhill argues and by manipulating the costs or risks imposed on target state populations This coercion by punishment strategy can be effected in two ways the first relies on straightforward threats to overwhelm a target s capacity to accommodate a refugee or migrant influx the second on a kind of norms enhanced political blackmail that exploits the existence of legal and normative commitments to those fleeing violence persecution or privation The theory is further illustrated and tested in a variety of case studies from Europe East Asia and North America To help potential targets better respond to and protect themselves against this kind of unconventional predation Weapons of Mass Migration also offers practicable policy recommendations for scholars government officials and anyone concerned about the true victims of this kind of coercion the displaced themselves

Dar Al Islam--the Mediterranean, the World System, and the Wider Europe Peter Herrmann,Arno Tausch,2005 With the process of a wider Europe EU Commission President Romano Prodi s ring of friends that extends from Marrakech in Morocco to St Petersburg in Russia gathering speed the growing rift between Europe and America also is about how to deal politically with the countries of the Mediterranean Muslim world The house of Islam Dar al Islam was pivotal to the European path to the Renaissance and to the re discovery of classic Greek philosophy The Mediterranean policy of the European Union aims at a positive and co operative relationship with the region A successful integration of the Mediterranean South would have tremendous and positive repercussions for regional and world peace World wide leading experts from the field of world systems analysis economics integration theory political science theology and area studies agnostics Christians Jews and Muslims alike discuss the issue with European decision makers The outcome is an interdisciplinary evaluation of this projected export of peace co operation dialogue and stability in the framework of world centre periphery relationships

State of the World 2002 Christopher Flavin,2002 In preparation for the World Summit on Sustainable Development in September 2002 in Johannesburg South Africa this book evaluates what has been achieved since the 1992 Earth Summit in Rio Ten years ago the leaders of the world produced a plan to begin creating a sustainable global economy one that meets human needs while protecting and restoring the natural environment How much progress has the world made toward that goal With the book as your guide you will learn about the problems facing the delegates in Johannesburg as they try to answer this question from today s severe inequalities of wealth and income 1 2 billion people live on 1 dollar a day or less to environmental threats such as climate change growing numbers of tourists in fragile areas and the proliferation of toxic chemicals The authors also shed light on the possibilities for change and how existing technologies and resources can help solve many of our most pressing problems Using renewables like wind power the energy economy can be converted from oil to hydrogen Poor farmers can grow more food by taking advantage of free biological services like nitrogen fixing plants and

beneficial insects And women can have fewer children when they have a chance to get an education and to act on their own decisions on when to have children The book spells out priorities for the Johannesburg Summit in seven key areas agriculture energy policy and climate change chemicals international tourism population growth resource based conflicts and global governance Decisions made today can make all the difference in our efforts to build a more stable and secure world in the future From back cover

The Choice Zbigniew Brzezinski, 2009-04-29 The overwhelming reality of our time is this In the opening years of the 21st century the United States finds itself not only the most powerful nation on earth but the most powerful nation that has ever existed Given the contradictory roles America plays in the world we are fated to be the catalyst for either a new global community or for global chaos If we don't lead Zbigniew Brzezinski contends rather than merely dominate by force we could face worldwide hostility much like the regional hostility now confronting Israel Brzezinski argues for a more complex and sophisticated view of our global role than much of our media and political leadership are willing to entertain We are the world's policeman but we have to be seen as a fair one We are entitled to a higher level of security than other nations because we assume greater risks but we are also the proponent of essential freedoms We are uniquely powerful but our homeland is uniquely and chronically vulnerable Globalization precludes immunity for even the most powerful This is an impressively lucid assessment informed by decades of experience on the front lines of foreign policy of where we stand in the world and where we should go from here
