[International Tables for Crystallography, Volume C](#) E. Prince, 2004-01-16 International Tables for Crystallography is the definitive resource and reference work for crystallography and structural science. Each of the volumes in the series contains articles and tables of data relevant to crystallographic research and to applications of crystallographic methods in all sciences concerned with the structure and properties of materials. Emphasis is given to symmetry diffraction methods and techniques of crystal structure determination and the physical and chemical properties of crystals. The data are accompanied by discussions of theory practical explanations and examples all of which are useful for teaching. Volume C provides the mathematical physical and chemical information needed for experimental studies in structural crystallography. This volume covers all aspects of experimental techniques using all three principal radiation types X ray electron and neutron from the selection and mounting of crystals and production of radiation through data collection and analysis to interpretation of results. Each chapter is supported by a substantial collection of references and the volume ends with a section on precautions against radiation injury. Eleven chapters have been revised corrected or updated for the third edition of Volume C. More information on the series can be found at <http://it.iucr.org>.
