Growing Together Personal Relationships Across The Life Span:

Growing Together Frieder R. Lang, Karen L. Fingerman, 2003-11-10 Understanding personal relationships throughout the life course is one of the most crucial issues in the behavioral and social sciences. This book brings together perspectives from different disciplines on individual development and personal relationships across the life span. The book addresses two pertinent dimensions of personal relationships: 1. structures of relationship networks (e.g., kin vs. non-kin, peripheral vs. intimate, short term vs. long term) and 2. processes (i.e., change or stability) and outcomes of personal relationships across the life span. The book stimulates discussion of personal relationships as resources for and outcomes of individual development throughout the life course. Different qualities of personal relationships serve as catalysts for individual development. At the same time, relationship qualities reflect changes of developing individuals. The book does not give exclusive priority to one phase of the human life span. Rather, each chapter addresses social development across the entire life span from childhood to later adulthood.

Growing Together Frieder R. Lang, Karen L. Fingerman, 2004 Understanding personal relationships throughout the life course is a crucial issue in the behavioral and social sciences. This book stimulates discussion of personal relationships as resources for and outcomes of individual development throughout the life course. Each chapter addresses social development across the entire life span. *Growing Together* Frieder R. Lang, Karen L. Fingerman, 2004 This edited volume integrates research on people's relationships from childhood to later adulthood.

Personal Relationships Across the Lifespan Patricia Noller, Judith Feeney, Candida Peterson, 2013-08-06 Personal Relationships Across the Lifespan presents a comprehensive and up-to-date account of the role of personal relationships in people's lives. Highlighting areas of special significance and research interest at each major life stage, Patricia Noller, Judith A. Feeney, and Candida Peterson examine how close relationships develop over time and influence individual adjustment. They explore a wide range of relationships, including some that are often neglected, such as those with siblings, adult children, and elderly parents. They also look at alternative family forms, such as single-parent families and step families, and address important themes such as intimacy, conflict, and power. With insightful discussion of the theory and methods typically used by researchers working in this area, *Personal Relationships Across the Lifespan* is an ideal resource for students and researchers of both relationships and lifespan development. It will also be of interest to practitioners such as social workers and family therapists working with clients with relational concerns, and anyone wanting to learn more about the nature of relationships.

Gerontology Kenneth Ferraro, Janet Wilmoth, 2013-04-26 This newest edition of a core graduate-level textbook has added six new chapters to further enrich the gerontological imagination and encourage an interdisciplinary approach to the study of aging. Academically rigorous yet clear and accessible, the text provides the most current findings from leading gerontological researchers and practitioners. New and updated chapters examine biology, exercise science, nutrition, communication science, geriatric medicine, and nursing, demography, anthropology, economics, human development, psychology, and political science.

Handbook of Life-Span Development Karen L. Fingerman,2011 Print CourseSmart *Beyond the Dyad* Michael Lewis,K. Takahashi,2005-01-01 There is consensus among social scientists that human beings from infants to elderly people develop social relationships with multiple significant others In fact everyday observations of individuals reveal that even infants interact not only with their mother but also with a variety of significant others However the attachment theory which has dominated theories and empirical studies of social relationships has argued for a narrower framework In this special issue four theoretical papers each of which provides models of social interaction that go beyond the mother child dyad are presented They theoretically contrast the attachment with the mother to relationships with multiple significant others and show that models assessing multiple relationships to others are more predicative of subsequent social and emotional adjustment Commentaries including attachment theorists and anthropologists to deepen the discussion are also presented Researchers and students in developmental psychology clinical psychology and psychiatry as well as teachers nurses and parents interested in these discussions will find in this issue essential theories that go beyond the mother child dyad
