Growth Triumphant Richard A. Easterlin, 1998-10-07 divAn economic historian and demographer considers what the world freed from material need will look like DIV **The World in the Long Twentieth Century** Edward Ross Dickinson, 2018-01-12 The biological transformation of modern times The foundations of the modern global economy Reorganizing the global economy Localization and globalization The great explosion New world dis order High modernity Revolt and refusal Transformative modernity Democracy and capitalism triumphant **Employment, Inequality and Globalization** Rolph van der Hoeven, 2013-09-13 The nature of globalization and the fallout from the international financial crisis have brought profound changes to societies and economies around the world This book documents that over the last two decades the growth of nonstandard and informal employment has led to greater inequalities This is partly explained by the fact that adjustment policies in the 1980s market liberalization policies in the 1990s and more recently globalization and anti poverty policies did not pay sufficient attention to policies for employment and income redistribution As a response to these trends this book recommends the development of clearer policies for employment and income redistribution These policies should now become an integral part of national and international economic policy making This is even more relevant in the current context of the international financial crisis as Several elements of globalization especially the unfettered markets and the growing inequality have given cause to the current crisis and There is growing evidence that the employment human and social effects of the financial crisis will be felt well after an economic recovery has taken place especially if no corrective action is taken This volume will be of benefit to policymakers scholars and practitioners alike This book was published as a special issue of the Journal of Human Development and Capabilities Economics, Religion and Happiness Vani Kant Borooah, 2023-10-09 Most books on happiness are concerned with answering in their diverse ways a basic question how should I live Such books assume however that the path to happiness lies entirely within one s control Happiness is simply a matter of doing certain things and refraining from doing certain other things This book however takes a different view It is that happiness is not always within our control but instead prey to the attitudes and actions of others Following Jean Paul Sartre s aphorism hell is other people the broad theme of this book is that unhappiness is other people In the language of economics other people through their attitudes and actions create externalities often negative which serve to make us unhappy The instruments for creating such externalities are intolerance and feelings of envy superiority This book expands on this theme in respect of three areas religion money and prejudice It is fair to say the existing unhappiness literature particularly in economics does not take many of these externalities into account Instead the focus is firstly on identifying the factors internal to oneself that contribute to personal happiness and secondly on measuring the relative strength of their contribution By contrast an analysis of the externalities that people impose upon others lies at the heart of this book Economics Religion and Happiness will primarily appeal to students academics and researchers across economics

psychology philosophy and sociology and will also find an audience among those interested in exploring issues related to happiness in greater depth *Allocating Public and Private Resources across Generations* Anne H. Gauthier, C.Y. Cyrus Chu, Shripad Tuljapurkar, 2006-09-25 This book explores how demographic changes affect inter generational transfers of time money goods and services all things that play a role in the well being of individuals and families It details the nature and measurement of transfers their motives and mechanisms and their macro level dimensions especially in the context of demographic transitions Coverage includes original empirical analyses of datasets from some twenty countries and extends the traditional analysis of inter generational transfers by examining different types of transfers **The Future of Corporate Globalization** Jeremiah J. Sullivan, 2002-03-30 Paradigms are shifting The capitalist market model or extended order whose globalization forces support the business methods of multinational corporations is giving way to the Global Village model one of justice virtue stability and national sovereignty Sullivan contends that by creating conditions for opposition globalization may be dooming itself Here he explains the shifting paradigm and considers its likely impact on corporate conduct Companies ignoring the growing chorus of discontent with globalization do so at their peril But those who adapt to new realities will not merely survive they will prosper This book details the adaptations that corporations need to implement to safeguard their roles in the future Corporate governance bodies will increasingly include NGO representatives and employees Justice stability virtue and national cultural identity will become corporate goals alongside the profit motive Customer relationships will become enriched by mutual obligations and trust Risky global corporate strategies will have less appeal than more stable avenues of action Employee relations will increasingly take into account workers growing desire for meaningful labor whose rewards entail more than financial remuneration Managers will become more like public servants and less like independent agents The persistence of these trends accelerated by the growing power of the Internet to bring far flung activists together in pursuit of common goals threatens the existing order as never before European Populations Van der Kaa, 2012-12-06 The changing demographic landscape which Europe is facing today and in the next decades reflects the past These changes constitute important challenges to European populations and societies Shifts in fertility and family formation in health morbidity and mortality in internal and international migration as well as changes in age structures in households in labour forces and in population growth and decline will influence the living conditions and well being of Europe s population directly or indirectly The demographic challenge also concerns the environment local regional and national developments education production and consumption patterns economic competitiveness social security housing employment and transport and health and social care provisions These issues their mechanisms determinants and consequences also challenge the scientific study of population As a major forum and market place for scientific demographic debate the 1999 European Population Conference EPC99 was organized to take up this challenge On the threshold of the third millennium European populations are united in diversity and face major demographic issues **The Fabulous**

Future? Morton Schapiro, Gary Saul Morson, 2015-05-05 Will the future be one of economic expansion greater tolerance liberating inventions and longer happier lives Or do we face economic stagnation declining quality of life and a technologically enhanced totalitarianism worse than any yet seen The Fabulous Future America and the World in 2040 draws its inspiration from a more optimistic time and tome The Fabulous Future America in 1980 in which Fortune magazine celebrated its twenty fifth anniversary by publishing the predictions of thought leaders of its time In the present volume the world s leading specialists from diverse fields project developments in their areas of expertise from religion and the media to the environment and nanotechnology Will we be happier and what exactly does happiness have to do with our economic future Where is higher education heading and how should it develop And what is the future of prediction itself These exciting essays provoke sharper questions reflect unexpectedly on one another and testify to our present anxieties about the surprising world to come
