**The Economic System and Income Distribution in Yugoslavia** Henryk Flakierski, 2016-07-22 This is the second volume in the author's ongoing inquiry into the extent of income inequality in the East European socialist countries and the effect of market oriented reforms on patterns of income distribution. Although there has been remarkably little empirical research on this question in part because of the problem of obtaining reliable data, both proponents and opponents of reforms voice strong views on this subject with both sides however tending to grant the assumption that decentralization and the increased use of market mechanisms will increase inequality. In this study as in the preceding volume *Economic Reform and Income Distribution: A Case Study of Hungary and Poland* Henryk Flakierski undertakes a study of the data in order to shed light on this question this time with reference to the most decentralized of the East European economies and the one in which marketization of the economy has been most advanced.
