The Organizational Hologram: The Effective Management of Organizational Change

Kenneth D. Mackenzie,1991 Previously the conventional wisdom about organizations was If it s not broken then don t fix it Today the new dictum seems to be If it works make it work better There is a shift from a posture of reaction to one that embraces change The prevailing wisdom is changing because many of our organizations are now or will soon be in a state of crisis Every day we read about a proud old firm going bankrupt manufacturers who must cut costs and retrench in order to survive and failures in our governmental agencies Who s next Many organizations are failing but others are doing well All wonder if something terrible could happen to their organization Thus it seems prudent to anticipate and proactively manage change rather than to passively sit by until some crisis strikes All of us know that any organization can be improved There will always be a gap between some desired state and our current reality There will always be differences among people about what is desirable and what is not Every change energizes these gaps Because there are so many changes taking place it is no wonder that there is continuous clamor for organizational change These gaps and differences are the source of problems Once a problem is recognized and agreed to efforts are made to generate a solution to it Every solution has both its intended and unintended consequences *Status of Open Recommendations* United States. inclusion for the rapidly dynamic Industry 4.0. Therefore linking technology more particularly machine intelligence with financial inclusion and technology access is quite crucial given the current technological environment. Additionally financial inclusion helps in enhancing the level of economic and social inclusion in many societies and developing countries as well as help in reducing poverty levels. Policy makers in several countries continue to commit significant resources and technologies to increase the level of financial inclusion in their countries to reduce financial exclusion. In developing countries financial inclusion remains below potential in part due to the digital divide, limited technology access and the challenge for financial institutions in developing products for the low income mass market.
