Egalitarian Politics In The Age Of Globalization:

Egalitarian Politics in the Age of Globalization Craig N. Murphy, 2016-01-11 In recent years women's movements and democracy movements appear to have been more successful in promoting social equality than labour movements or development movements Wage gaps between men and women have narrowed New democracies have flourished Yet gaps between the rich and poor remain Do differences in organization and strategy account for the differences in outcomes Through in depth studies of the United States Eastern and Western Europe Latin America Africa China and north and southeast Asia the contributors to this volume provide some thought provoking answers Egalitarian Politics in the Age of Globalization Craig Murphy, 2003 *Public Policy in the Age of Globalization* H. Hveem, K. Nordhaug, 2002-11-04 This book focuses on changes in environmental and economic policies in six developing countries It shows how domestic politics interact with international actors such as multilateral institutions It offers lively accounts of the behaviour of political actors interest groups and the civil society in particular environmentalists It shows how ideas such as those of neoliberal economics affect policymaking in particular during or after crisis but also how social protest and demands for sustainable development are mobilized

Evolutionary Interpretations of World Politics William R. Thompson, 2016-05-06 The field of international relations is often stagnated in realism and liberalism Groundbreaking and guaranteed to stir debate this work will move the field of international relations beyond its current and often inadequate assumptions The contributors describe how states ideologies and other areas of analysis evolve conquer others or disappear entirely Change and the fluid nature of history though so clearly a part of historical reality are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations Some contributors lay out the various controversies inherent to the new theory while others apply the paradigm to specific problems in IR theory Regardless of the approach the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations Contributors include William R Thompson George Modelski Vincent S E Falger David P Rapkin Jennifer Sterling Folker Hendrik Spruyt Stewart Patrick Paul Hensel Karen Rasler Craig N Murphy Jeffrey A Hart Sangbae and Brian Pollins **New**

Modes of Governance in the Global System M. Koenig-Archibugi, M. Zürn, 2005-11-30 Globalization processes are propelling a transformation of governance As political problems become more transnational public as well as private actors increasingly perform governance activities beyond the level of individual states This book examines the wide variety of forms that governance can take in the global system and their consequences An overarching analytical framework is applied to global institutions and initiatives in areas such as trade liberalization financial market regulation privacy protection cybercrime and food safety Neoliberalism in Crisis Henk Overbeek, Bastiaan van Apeldoorn, 2012-02-29 The authors interrogate the condition of the neoliberal project in the wake of the global crisis and neoliberalism's predicted death in 2007 both in terms of the regulatory structures of finance led capitalism in Europe and North America and the impact of new

centres of capitalist power on global order *The Future of US Global Power* S. Brown, 2012-12-14 Dispelling the myth of decline Stuart Brown argues that the US continues to enjoy the economic political cultural and military underpinnings befitting a pre eminent global power He provides an analytical tour through the major domestic and foreign policy issues that will impact the United States future position and role in the global system **Critical International Political Economy**

Stuart Shields, Ian Bruff, Huw Macartney, 2011-02-01 Amidst the continued debate surrounding the foundations of IPE coupled with recent methodological and theoretical divides this book argues that an attempt should be made to re visit the notion of the critical The challenge posed by contributors to this volume is to assess the development of so called critical IPE and interrogate whether the theoretical foundations it was built upon have reached their potential The essays in this volume take up this challenge in a number of different ways but all share a common concern to re assess the purpose of critical approaches reflect on why certain social theorists have been favoured as a point of departure yet others have largely been ignored In light of recent debates on the notion of a trans Atlantic divide within IPE the collection the contributors aim demonstrates how the distinction between the critical and the orthodox or empirical is only significant if the critical is geared towards a larger more substantial body of critical social enquiry and engages with what it means to conduct such enquiry

Investment Incentives and the Global Competition for Capital K. Thomas, 2010-11-24 This is a global study of government subsidies to attract investment The book shows how corporations use site selection as rent extraction with developing countries investing more than developed ones It demonstrates that incentive use is rarely a good policy especially for countries without adequate education and infrastructure **Regions and Crises** Lorenzo Fioramonti, 2012-06-26

Investigates the intimate relationship between regional governance processes and global crises Analysing the current turmoil in the European Union it also looks at regional cooperation and integration in the Arab world Africa Asia and Latin America through topical case studies Partnerships and Foundations in Global Health Governance S. Rushton, O.

Williams, 2011-02-01 This book argues that the new actors in global health constitute a private turn in global health governance and provides theoretical and practical grounds for viewing global health partnerships and philanthropic foundations as closely aligned in their ideational and material approaches to a range of important issues and crises

Global Commodity Governance F. Gale, Marcus Haward, 2011-02-01 The Forest and the Marine Stewardship Councils constitute new global governance institutions using voluntary certification and labelling as market incentives to encourage sustainable management Utilizing a comparative political economic framework the authors analyse shifting British Canadian and Australian responses to the stewardship councils **The Political Economy of Sport** J. Nauright, K.

Schimmel, 2005-09-27 Sport studies has become one of the largest and fastest growing international industries This collection of essays from a range of international contributors analyzes all aspects of the political economy of this industry including media sports production urban growth politics and capital accumulation and the economic effects of Olympism *The*

Globalizations of Organized Labour G. Mykonos, 2005-09-06 Mykonos explores the ways in which organized labour has globalized since 1945 Using two touchstone indicators the extent of cross border integration and the autonomy vis vis the state the book reveals a counterintuitive process network globalization involves a continuing orientation towards the state The book not only seeks to identify organized labour's trajectory on the macro plane but also to provide a more precise meaning of the term globalization as it relates to agency

Global Encounters G. Harrison, 2004-11-09 How has globalization impacted on development For Harrison the answer lies in the international political economy and the ways in which states have managed economic globalization from positions of strength or weakness Key themes emerge such as new geographies of development and the constant need for state economic action

Global Restructuring, State, Capital and Labour A. Bieler, W. Bonefeld, P. Burnham, A. Morton, 2006-04-26 This book provides a critical engagement between contending historical materialist approaches that have played a crucial role in shaping post positivist International Relations theory It analyzes globalization as a process of state formation and argues that its fate depends on the neo liberal recomposition of labour relations

Theories of New Regionalism F. Söderbaum, T. Shaw, 2003-11-11 Theories of New Regionalism represents the first systematic attempt to bring together leading theories of new regionalism Major theorists from around the world develop their own distinctive theoretical perspectives spanning new regionalism world order approaches along with regional governance liberal institutionalism neoclassical development regionalism to regional security complex theory RSCT and the region building approach

The Neoliberal Revolution Richard Robison, 2006-03-28 The book examines the rise of the amalgam of economic and political ideas we know as neo liberalism and how these became the defining orthodoxy of our times It investigates the inexorable global spread of market economies and how neo liberal agendas are accommodated or hijacked in collisions with authoritarian states and populist oligarchies

Protesting America Katharine H. S. Moon, 2013 When the U S Korea military alliance began to deteriorate in the 2000s many commentators blamed anti Americanism and nationalism especially among younger South Koreans Challenging these assumptions this book argues that Korean activism around U S relations owes more to transformations in domestic politics including the decentralization of government the diversification and politics of civil society organizations and the transnationalization of social movements

Global Restructuring and the Power of Labour Bill Dunn, 2004-05-28 Bill Dunn considers and contests accounts of globalization and post Fordism that see structural economic change in the late Twentieth century as having fundamentally worsened the conditions and weakened the potential of labour Including a comparative survey of restructuring in four major industries automobiles construction microelectronics and finance the book suggests the timing of change and its complex and contradictory nature undermine structural explanations of labour's situation It redirects attention towards labour's political defeats and own institutional shortcomings
