## **Elephants And Ivory Lessons From The Trade Ban:**

*Elephants and Ivory* Ike C. Sugg, Urs P. Kreuter, 1994 The authors examine the example of elephants in this exposition of the arguments favouring sustainable utilisation This approach ensures species survival by employing a framework based upon property rights enforcement of those rights and local community involvement **Elephants And Ivory** Ike / Kreuter Sugg (Urs), 1994

**The Debatabase Book** International Debate Education Association, 2004 An invaluable resource for debaters The Debatabase Book provides background arguments and resources on more than 125 debate topics in areas as diverse as business science and technology environment politics religion culture and education All topics have been updated and 15 new topics added for the revised edition Each entry presents an introduction placing the topic in context arguments pro and con sample motions and Web links and print resources for further research Organized in a handy A Z format the book also includes a topical index for easy searching **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved

**The Invisible Heart** Russell Roberts, 2002-02-22 A lively unorthodox look at economics business and public policy told in the form of a novel A love story that embraces the business and economic issues of the day The Invisible Heart takes a provocative look at business economics and regulation through the eyes of Sam Gordon and Laura Silver teachers at the exclusive Edwards School in Washington D C Sam lives and breathes capitalism He thinks that most government regulation is unnecessary or even harmful He believes that success in business is a virtue He believes that our humanity flourishes under economic freedom Laura prefers Wordsworth to the Wall Street Journal Where Sam sees victors she sees victims She wants the government to protect consumers and workers from the excesses of Sam's beloved marketplace While Sam and Laura argue about how to make the world a better place a parallel story unfolds across town Erica Baldwin the crusading head of a government watchdog agency tries to bring Charles Krauss a ruthless CEO to justice How are these two dramas connected Why is Sam under threat of dismissal Will Erica Baldwin find the evidence she needs Can Laura love a man with an Adam Smith poster on his wall The answers in The Invisible Heart give the reader a richer appreciation for how business and the marketplace transform our lives **Are African Elephants an Endangered**

**Species?** Greg Hertzler, Maxwell Gomera, 2004 **Life's Adventure: Virtual Risk in a Real World** Roger Bate, 2013-06-17 We live in a dangerous world Numerous hazards can strike us down from infectious diseases and genetic disorders to food poisoning and car crashes Furthermore the advances in information technology enable consumers to be more aware of these problems as the latest data on new hazards is spun around the world in a matter of seconds As part of the opinion forming sector as a think tank researcher and opinion editorial writer Roger Bate has contributed to this information exchange His writing over the past five years as reflected in this book has focussed on 5 key themes 1 Hazards are as likely to come from natural as from man made substances 2 The linear no threshold hypothesis is rubbish i e the dose makes the poison 3 An entire industry has developed to scare us into stopping certain activities or making us feel guilty for continuing them or

lobbying to have them banned by government 4 The public are quite capable of making decisions that involve complex trade offs if only we would let them indeed not letting them causes enormous problems as government bodies do not have the dispersed knowledge to do this and are subject to interest group pressure 5 There are innumerable benefits as well as costs from risk taking Most articles concerning risk avoid mentioning any of the above five themes The articles for this book were originally published in the Wall Street Journal Financial Times Economic Affairs and The Sunday Times An introduction will draw all the articles together

Africana Anthony Appiah, Henry Louis Gates (Jr.), 2005 Ninety years after W E B Du Bois first articulated the need for the equivalent of a black Encyclopedia Britannica Kwame Anthony Appiah and Henry Louis Gates Jr realized his vision by publishing Africana The Encyclopedia of the African and African American Experience in 1999 This new greatly expanded edition of the original work broadens the foundation provided by Africana Including more than one million new words Africana has been completely updated and revised New entries on African kingdoms have been added bibliographies now accompany most articles and the encyclopedia's coverage of the African diaspora in Latin America and the Caribbean has been expanded transforming the set into the most authoritative research and scholarly reference set on the African experience ever created More than 4 000 articles cover prominent individuals events trends places political movements art forms business and trade religion ethnic groups organizations and countries on both sides of the Atlantic African American history and culture in the present day United States receive a strong emphasis but African American history and culture throughout the rest of the Americas and their origins in African itself have an equally strong presence The articles that make up Africana cover subjects ranging from affirmative action to zydeco and span over four million years from the earliest known hominids to Sean Diddy Combs With entries ranging from the African ethnic groups to members of the Congressional Black Caucus Africana Second Edition conveys the history and scope of cultural expression of people of African descent with unprecedented depth

Encyclopedia of Environment and Society Paul Robbins, 2007-08-27 As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader's guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN's economic indicators complete the set Library Journal this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both for its content and as a yardstick to measure progress toward sustainability and conservation Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008 This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all Booklist Starred Review Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins

This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world

**A Primer on Modern Themes in Free Market Economics and Policy** John M. Cobin, 2009 Free market economics has made many advances during the past thirty years These advances are due to the maturing of public choice theory and empirical studies along with a resurgence of interest in Austrian economic themes like free banking market process entrepreneurship and the critique of socialism and interventionism In addition new avenues have opened in law and economics and regulatory studies which favor free market ideas The purpose of this book is to introduce and summarize some of the important advances in contemporary free market economics and policy by introducing the key concepts of public choice public policy Austrian economics and law and economics This volume is a non technical compendium of thought which incorporates long quotations from important scholars in each field ideal for students wishing to survey these topics without having to read dozens of academic articles and

books Also presented is new theory regarding topics such as perverse incentives and allodial real property policy The second edition is significantly expanded including updated information and articles new research in areas such as family policy new tables and is easier to read with improved organization      **Animal Rights** John M. Kistler,2000-06-30 Introductions to each chapter explain the issues as well as the arguments that surround them and a general introduction to the volume thoroughly explains how to use the book Each entry contains the following information author title edition series title location of publisher name of publisher number of pages year of publication and International Standard Book Number Annotations include the most important information available to help the researcher including web sites that contain not only the full text of the book when available but also excerpts and articles or interviews by the author short quotations from the books and short descriptions and summaries of the books All the information provided allows students to locate exactly what they need while encouraging them to explore other issues and differing viewpoints      **Conservation Biology** Andrew S.

Pullin,2002-06-27 This colourful textbook introduces students to conservation biology the science of preserving biodiversity

Conservation of Exploited Species John D. Reynolds,2001-10-18 The use of wildlife for food and other human needs poses one of the greatest threats to the conservation of biodiversity Wildlife exploitation is also critically important to many people from a variety of cultures for subsistence and commerce This book brings together international experts to examine interactions between the biology of wildlife and the divergent goals of people involved in hunting fishing gathering and culling wildlife Reviews of theory show how sustainable exploitation is tied to the study of population dynamics with direct links to reproductive rates life histories behaviour and ecology As such theory is rarely put into practice to achieve sustainable use and effective conservation Conservation of Exploited Species explores the many reasons for this failure and considers remedies to tackle them including scientific issues such as how to incorporate uncertainty into estimations as well as social and political problems that stem from conflicting goals in exploitation      **The European Union and**

**Globalisation** Brigid Gavin,2001-01-01 This work shows how the EU has evolved constitutionally beyond the internal market into a highly developed system of multi level governance It explores path breaking reforms for increased parliamentary control of globalization in the WTO and a concrete model for implementation      Climate Liberalism Jonathan H.

Adler,2023-01-31 Climate Liberalism examines the potential and limitations of classical liberal approaches to pollution control and climate change Some successful environmental strategies such as the use of catch shares for fisheries instream water rights and tradable emission permits draw heavily upon the classical liberal intellectual tradition and its emphasis on property rights and competitive markets This intellectual tradition has been less helpful to date in the development or design of climate change policies Climate Liberalism aims to help fill the gap in the academic literature examining the extent to which classical liberal principles including an emphasis on property rights decentralized authority and dynamic markets can inform the debate over climate change policies The contributors in this book approach the topic from a range of perspectives

and represent multiple academic disciplines Chapters consider the role of property rights and common law legal systems in controlling pollution the extent to which competitive markets backed by legal rules encourage risk minimization and adaptation and how to identify the sorts of policy interventions that may help address climate change in ways that are consistent with liberal values      **The Voluntary City** David T. Beito, Peter Gordon, Alexander Tabarrok, 2009-10-01

Assembling a rich history and analysis of large scale private and voluntary community based provision of social services urban infrastructure and community governance this book provides suggestions on how to restore the vitality of city life Historically the city was considered a center of commerce knowledge and culture a haven for safety and a place of opportunity Today however cities are widely viewed as centers for crime homelessness poverty unemployment traffic pollution and other social ills In many cities government increasingly dominates life consuming vast resources to cater to special interest groups Decision making has become intensely politicized bureaucratic and largely unaccountable to the populace The Voluntary City provides a rich history and analysis of private locally based provision of social services urban infrastructure and community governance Such systems have offered superior education transportation housing crime control recreation health care and employment by being more effective innovative and responsive than those provided through special interest politics and bureaucracy The Voluntary City reveals how the process of providing local public goods through the dynamism of freely competitive market based entrepreneurship is unmatched in renewing communities and strengthening the bonds of civil society A refreshing challenge to the orthodoxy that government alone can improve community life The Voluntary City will be an essential reference for anyone interested in the future of cities including scholars and students policy makers civic and business leaders and urban citizens      **Law and Economics for Civil Law**

**Systems** Mackaay, Ejan, 2021-11-18 This second edition of Law and Economics for Civil Law Systems substantially updates a unique work that presents the core ideas of law and economics for audiences primarily familiar with civil law systems

International Bibliography of Economics 1994 British Library of Political and Economic Science at the London School of Economics, 1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences

*Lessons from Luangwa* Barry Dalal-Clayton, D. Barry Dalal-Clayton, Brian Child, 2003      Conservation Reconsidered Charles T. Rubin, 2000 The prominent contributors in Conservation Reconsidered establish a fundamentally original view of the conservation movement and the impact of public policy on nature This collection of essays articulate the belief that the thinkers and actors who helped develop the conservation movement notably John Muir Theodore Roosevelt Gifford Pinchot and Aldo Leopold have been seriously misunderstood by scholars who have analyzed them in the context of contemporary environmental debates Conservationism the contributors argue was a diverse movement dealing with difficult questions about the relationship of human beings to nature in a modern liberal democratic state The essays place conservationism

within the framework of 19th century American political thinkers including Darwin Emerson Thoreau and Olmsted and they illuminate perennial questions about citizenship and our place in the natural world Conservation Reconsidered takes a new look at what is problematic about the legacy of American conservationism and explores worthy alternatives to the dominant environmentalist thinking of today

**Transnational Environmental Crime** Rob White, 2017-07-05 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature The topics covered range from pollution and waste to biodiversity and wildlife crimes and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it Differential victimisation and contemporary developments in environmental law enforcement are also considered Collectively these essays lay the foundations for a criminology that is forward looking global in its purview and that deals with the key environmental issues of the present age

## Unveiling the Magic of Words: A Review of "**Elephants And Ivory Lessons From The Trade Ban**"

In a world defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their power to kindle emotions, provoke contemplation, and ignite transformative change is actually awe-inspiring. Enter the realm of "**Elephants And Ivory Lessons From The Trade Ban**," a mesmerizing literary masterpiece penned by a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve into the book's central themes, examine its distinctive writing style, and assess its profound impact on the souls of its readers.
